

LEZIUNEA ȘI MOARTEA CELULARĂ

Leziuni celulare

- Leziunea celulară reversibilă
- Leziunea celulară ireversibilă
- Moartea celulară : necroza și apoptoza

LEZIUNI REVERSIBILE ȘI IREVERSIBILE

Citoplasmatică:

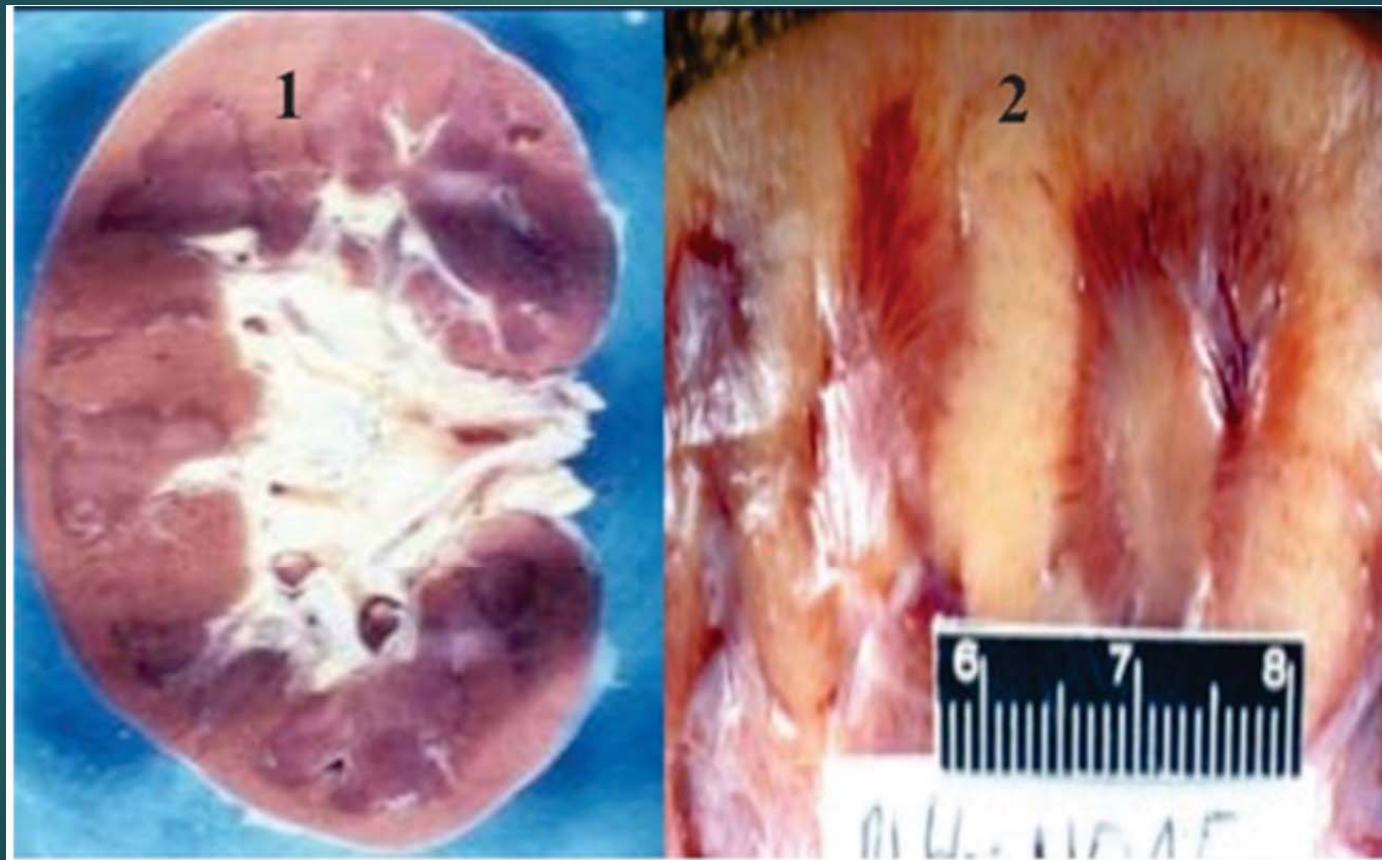

- Degenerescenta hidropică
- Degenerescenta grasă

Nucleare:

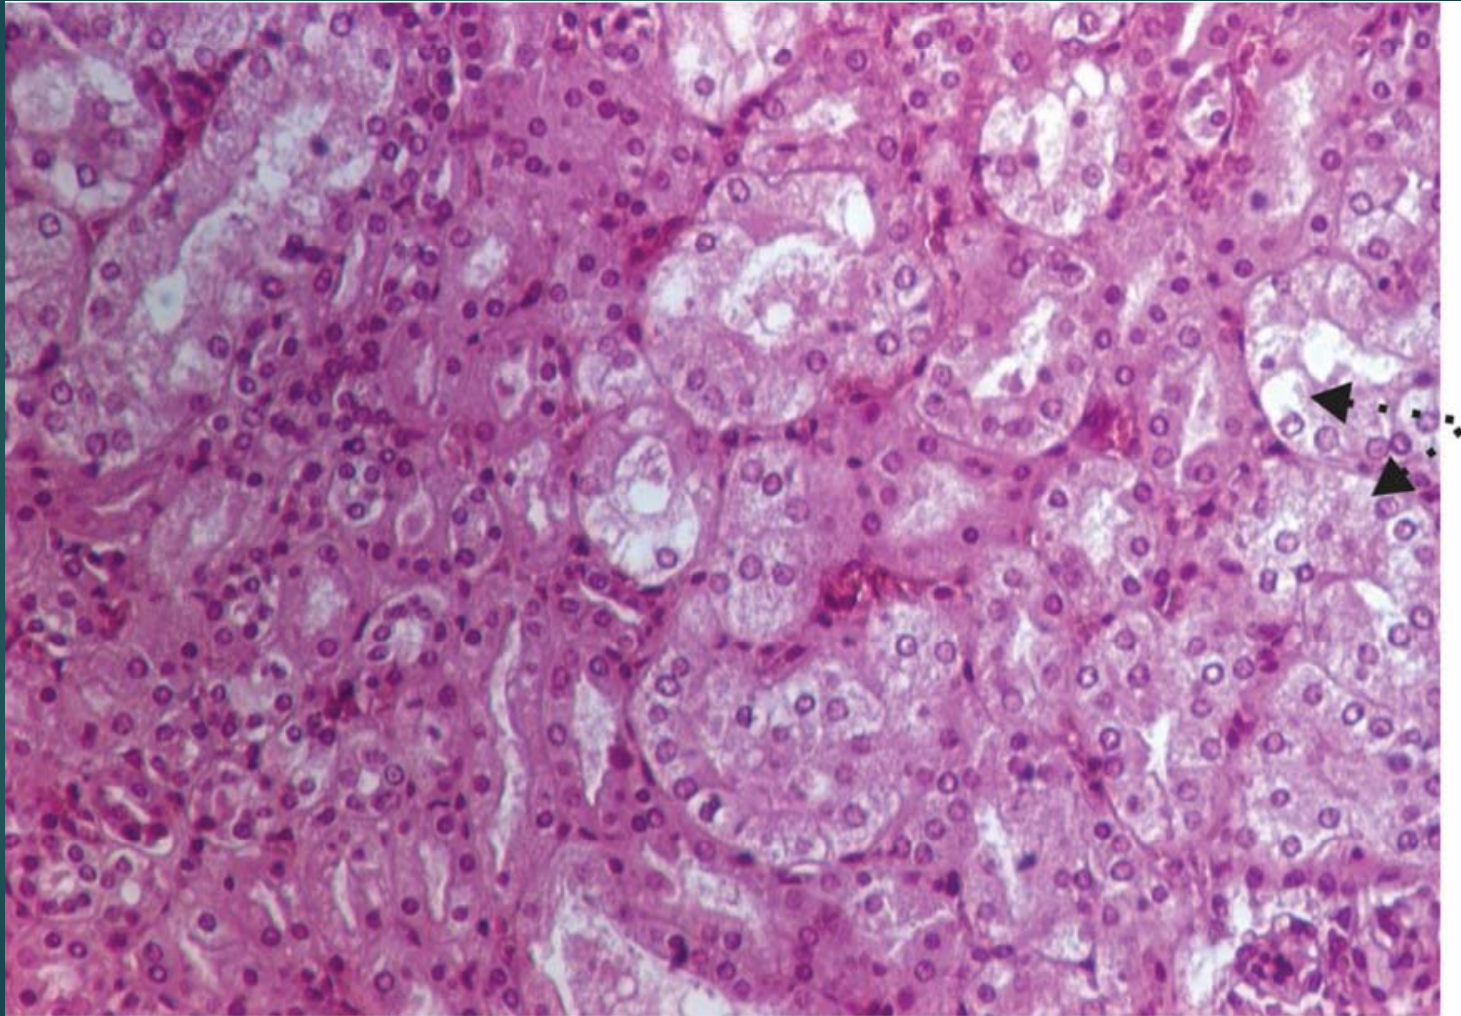

- Cariopicnoza
- Cariorexa
- Carioliza

FICAT

FICAT

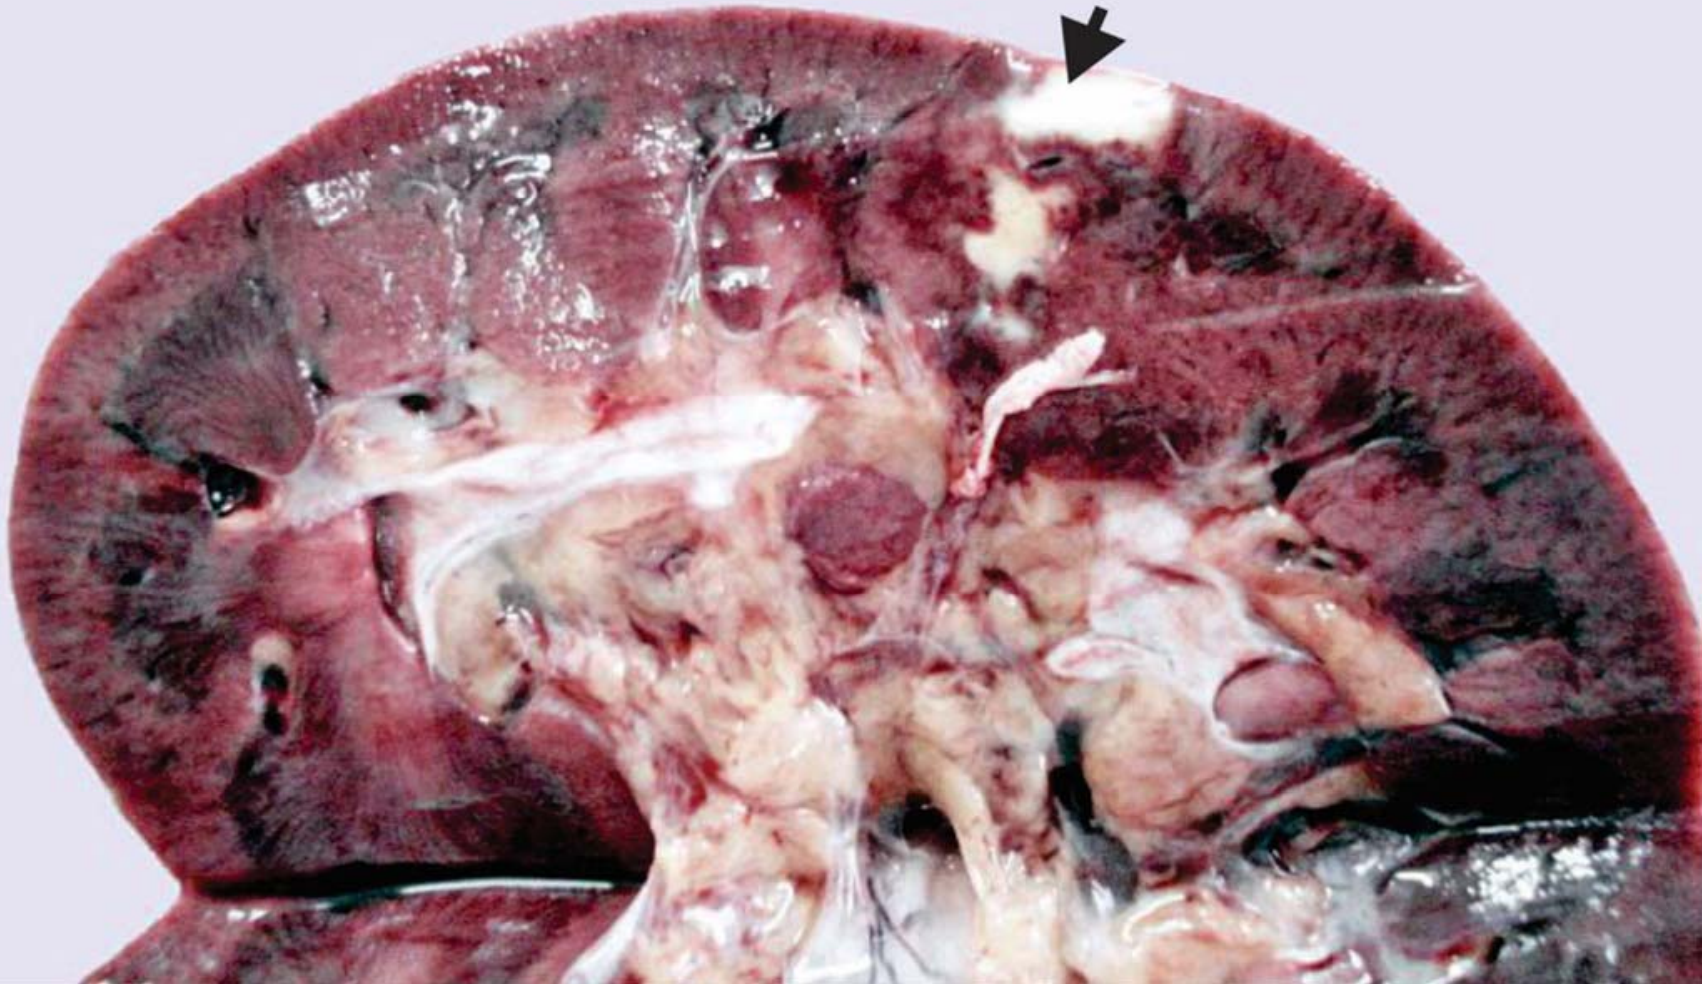

NECROZA

Necroza constituie etapa finală și ireversibilă a alterărilor structurilor.

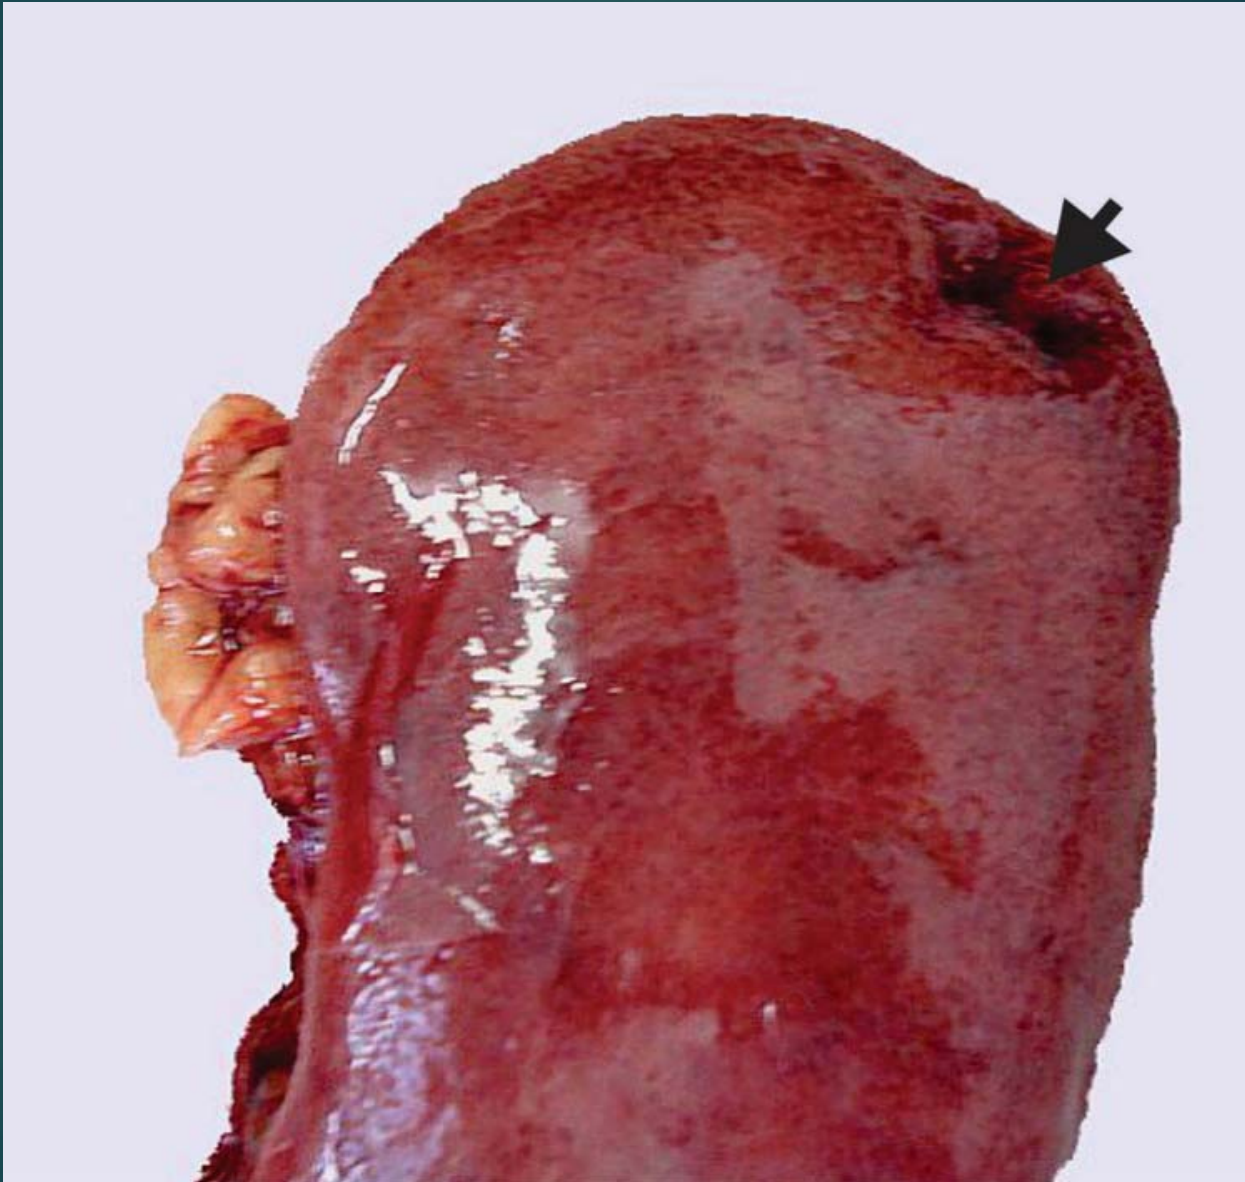

- Necroza de coagulare
- Necroza de lichefacție
- Necroza de cazeificare
- Citosteatonecroza
- Necroza fibrinoidă
- Escara (necroza de decubit)
- Gangrena

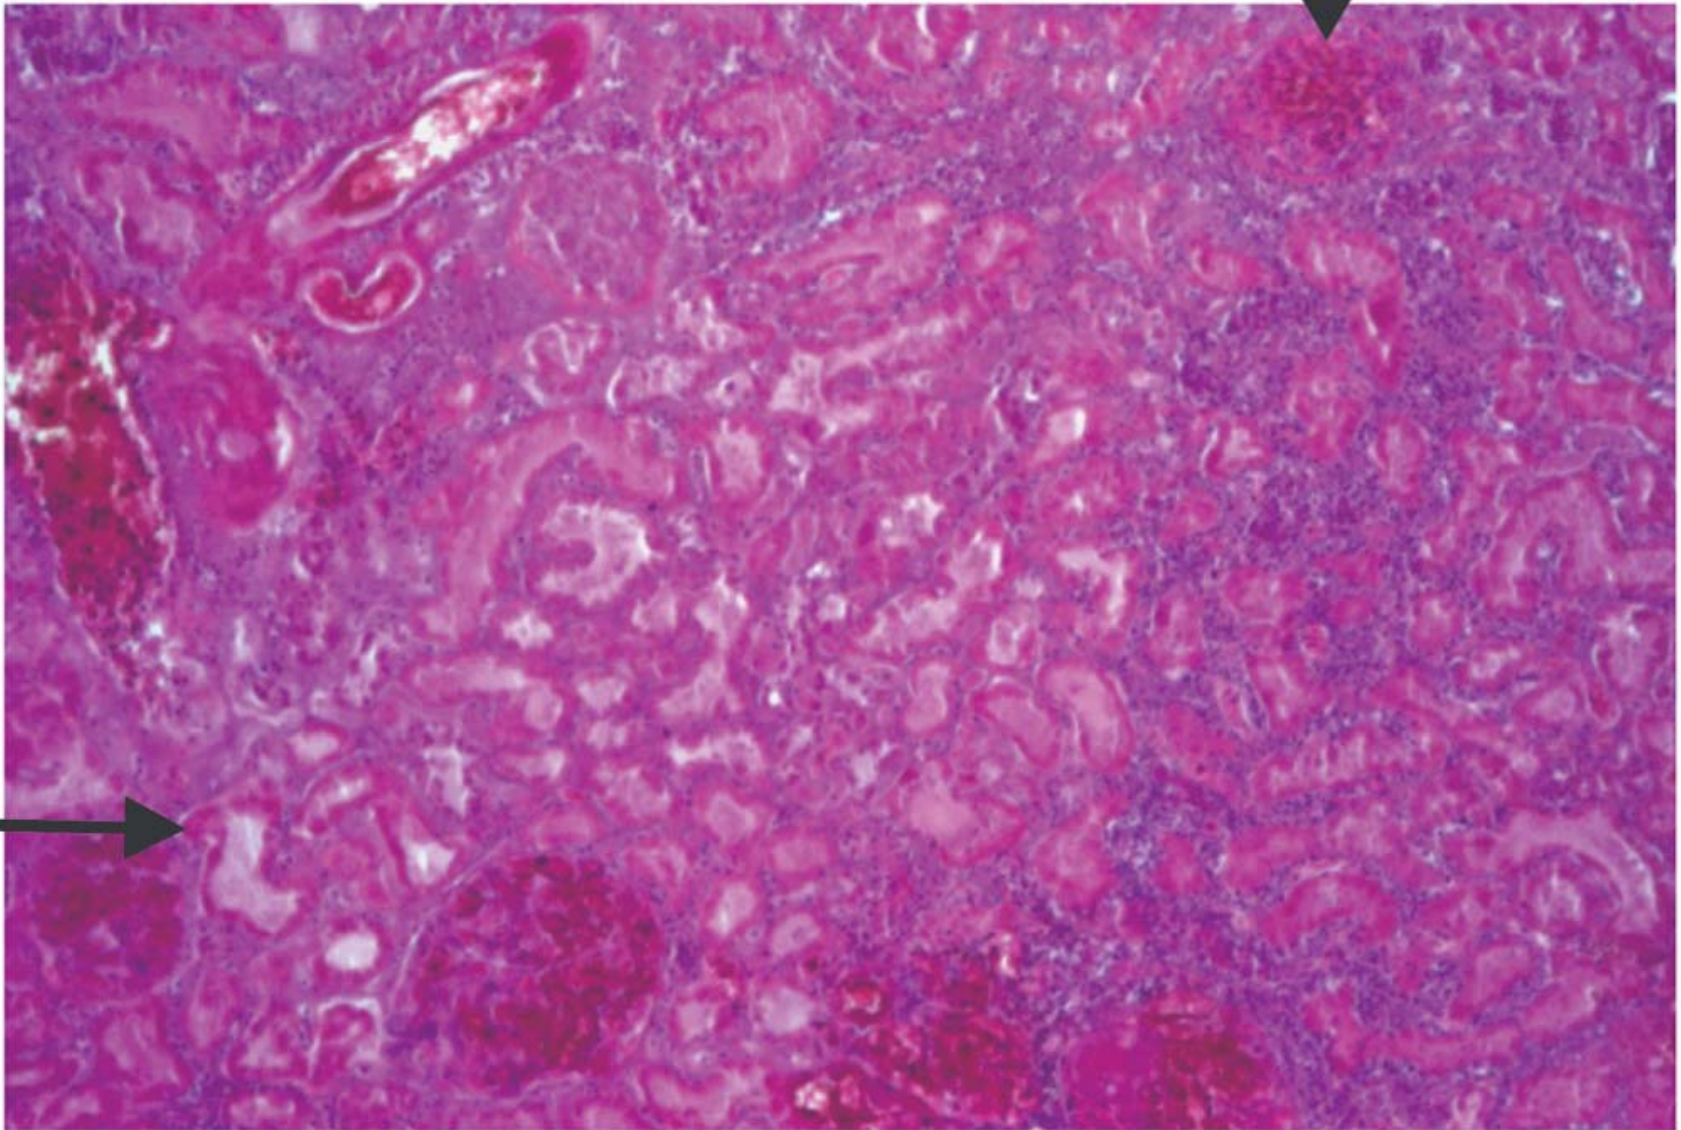

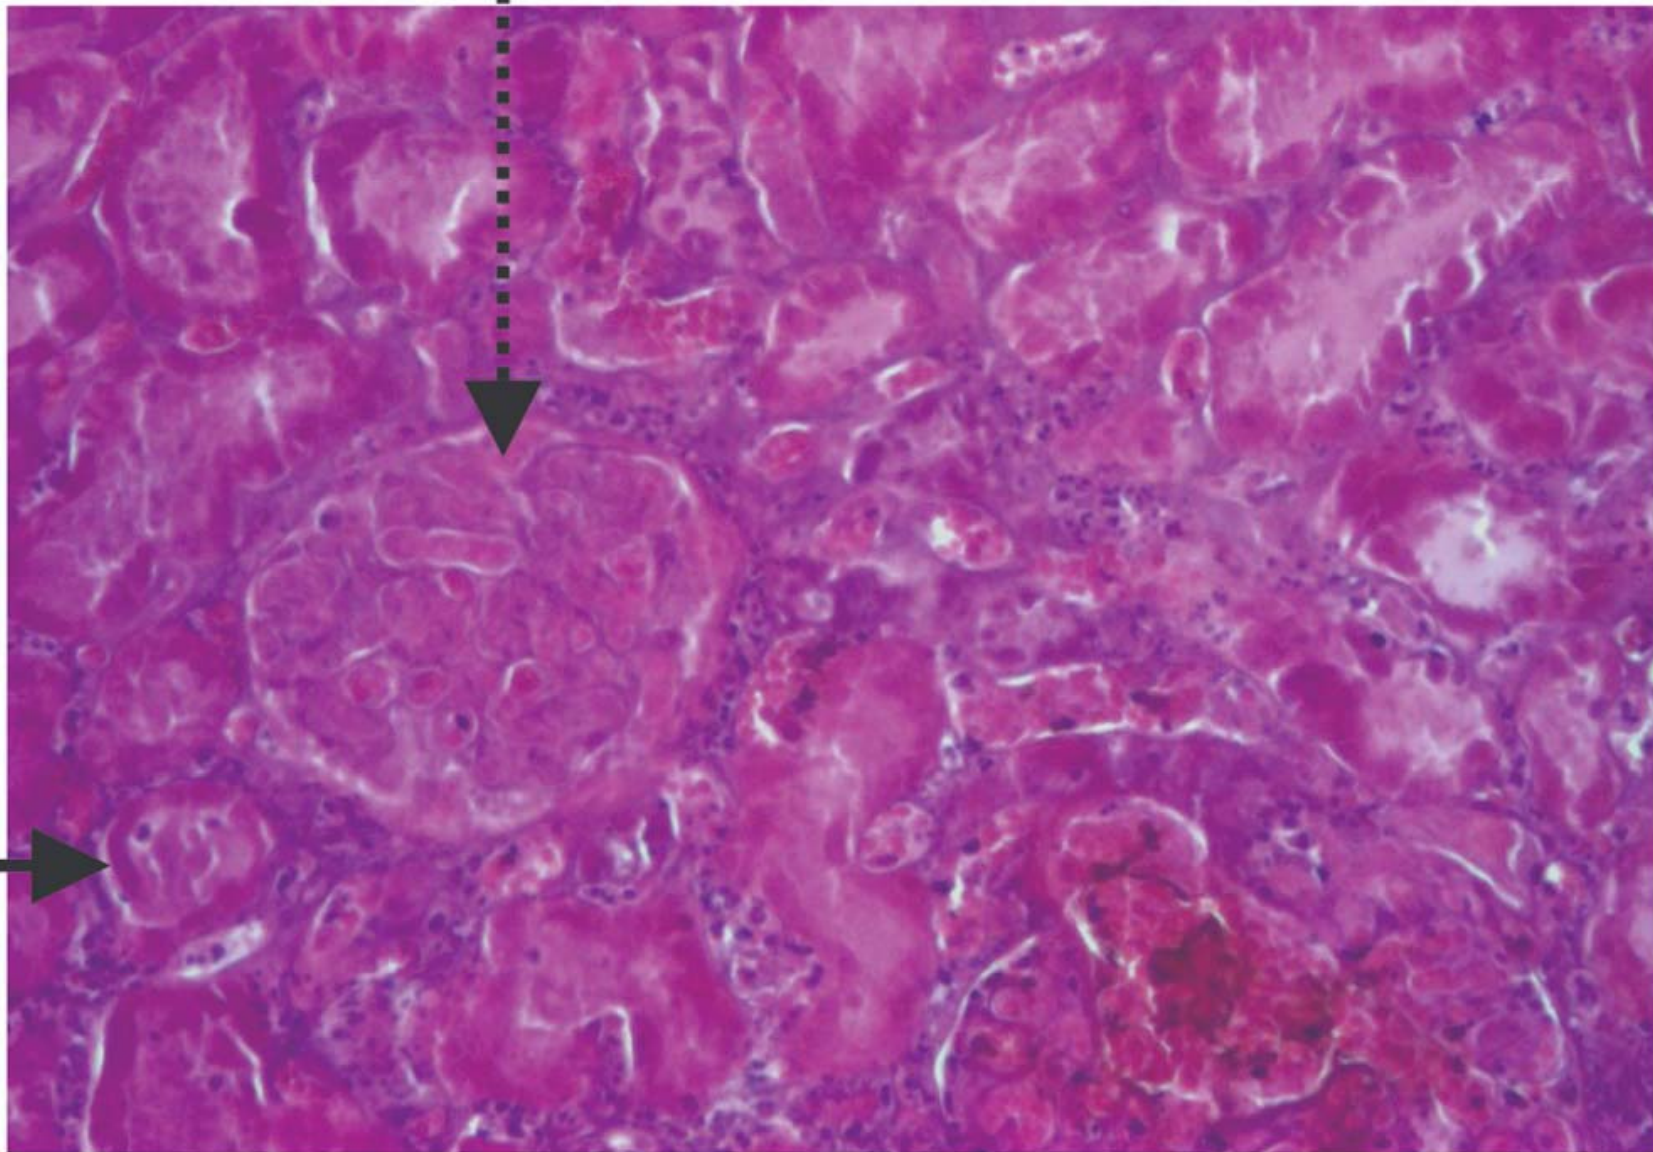

INFARCT RENAL

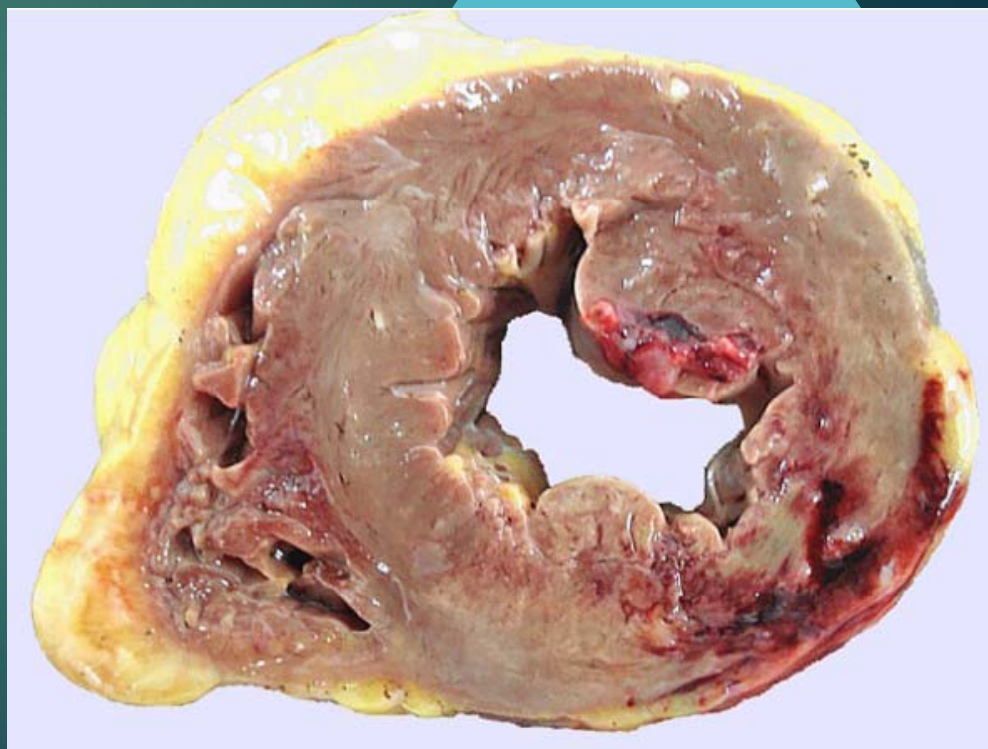

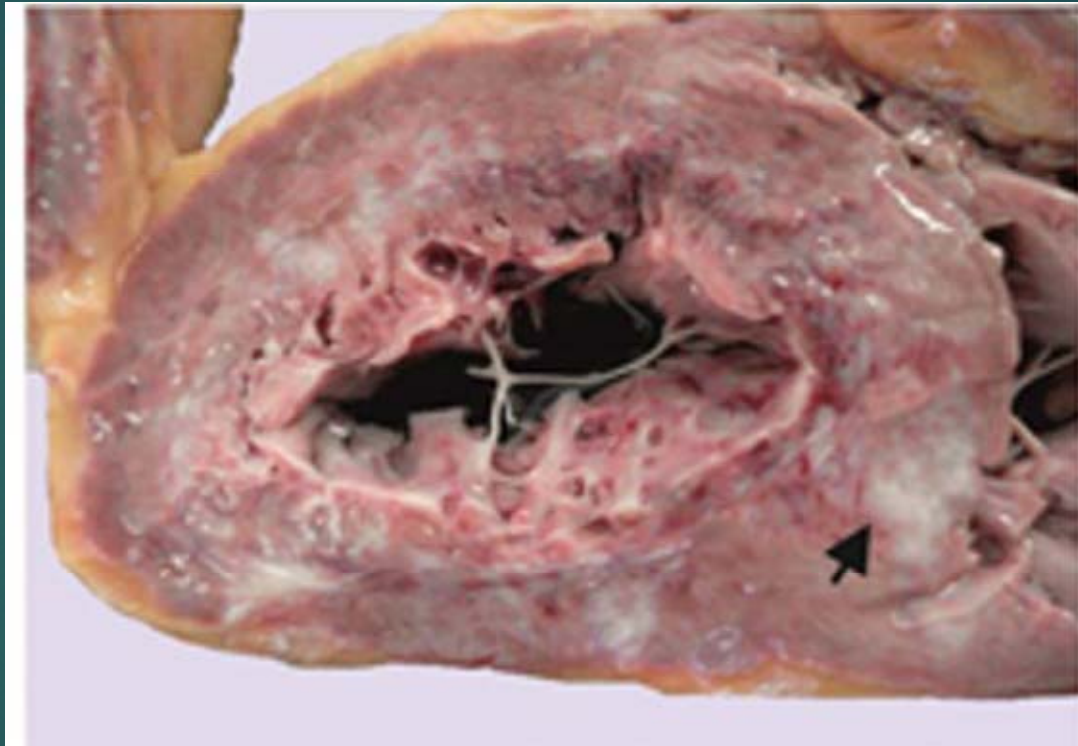

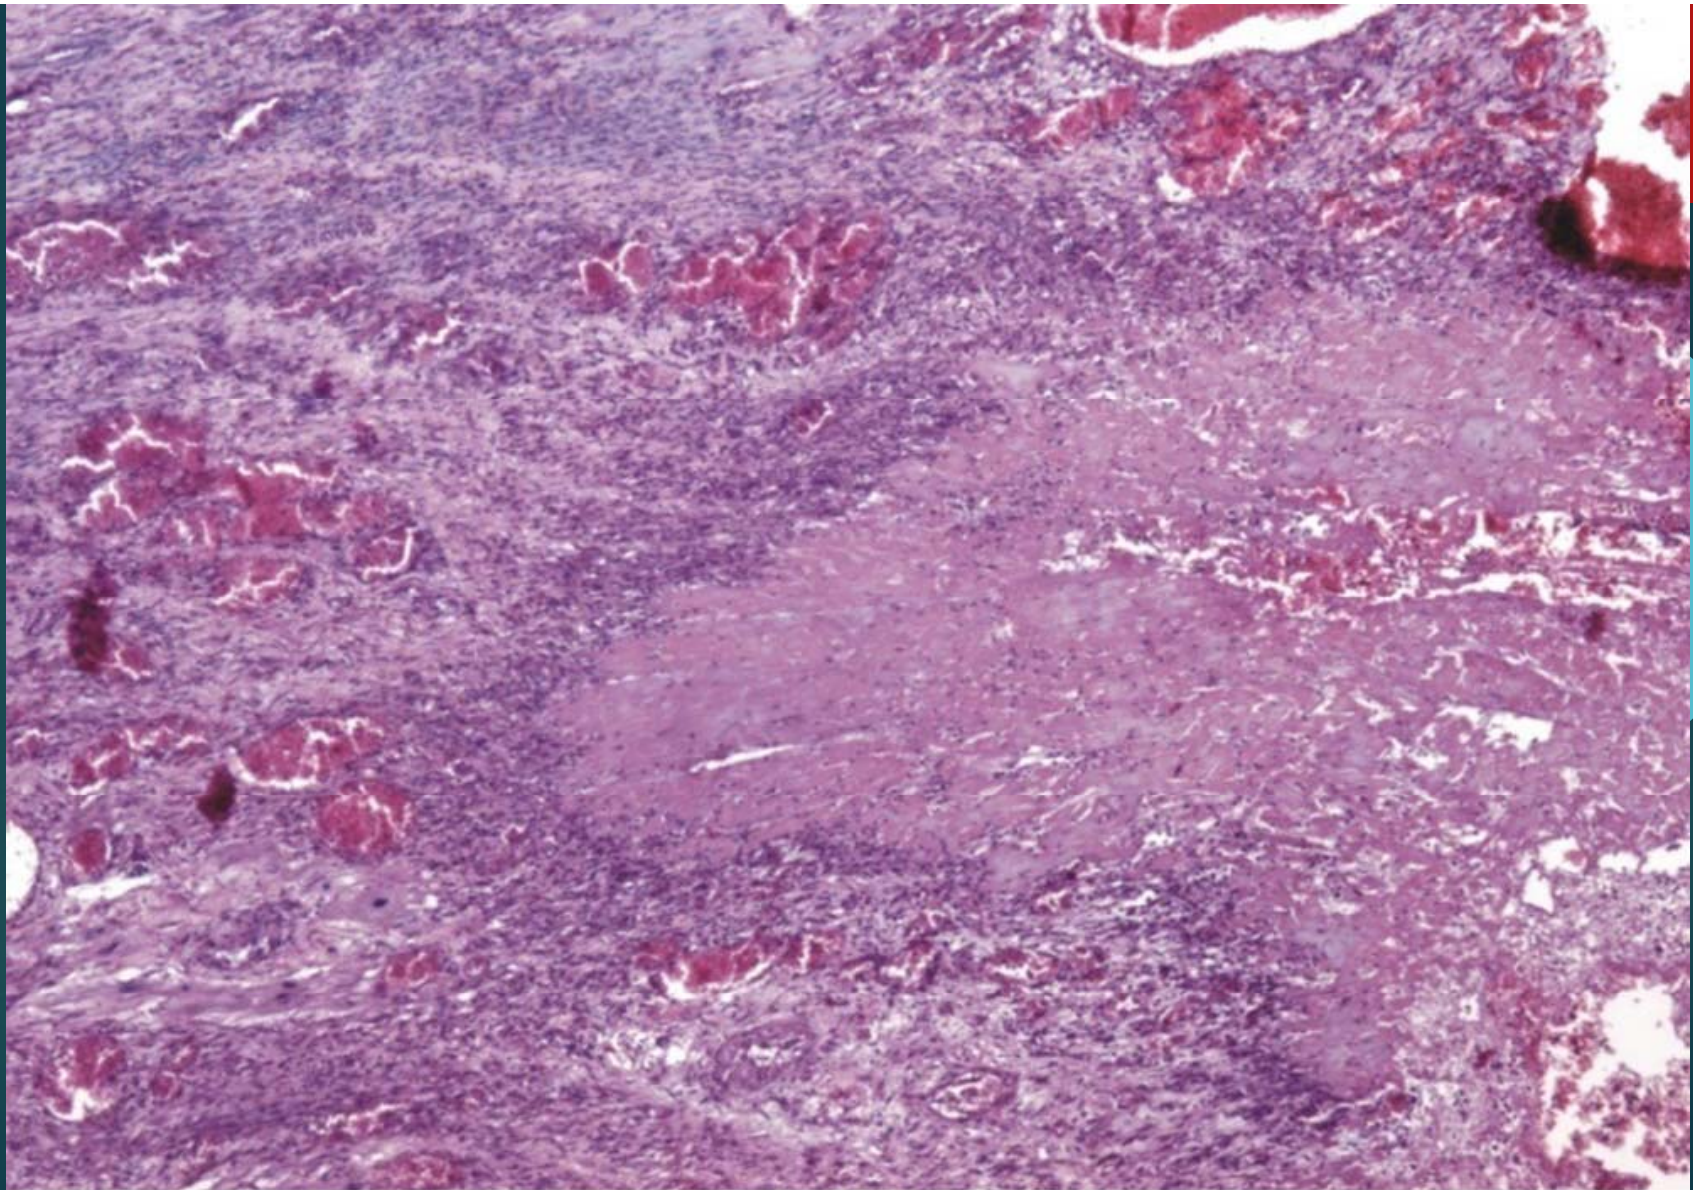

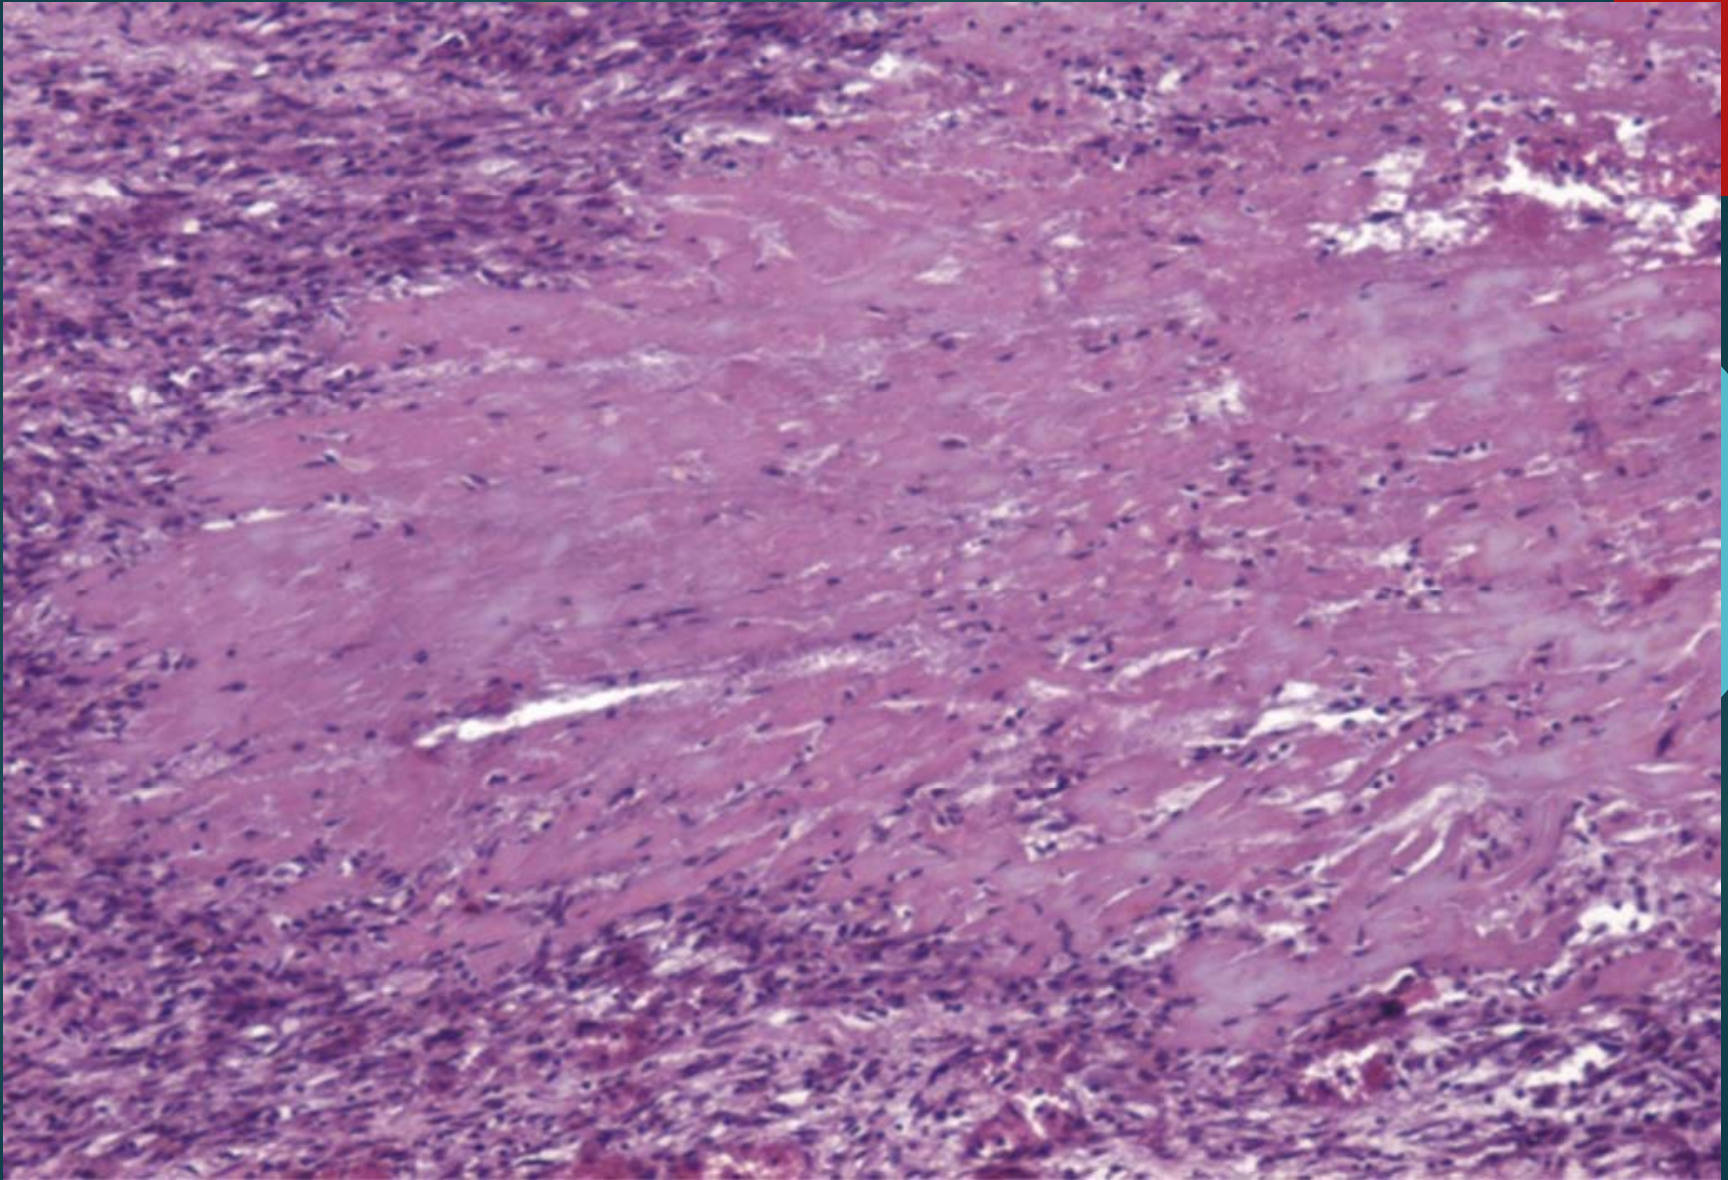

INFARCT CARDIAC

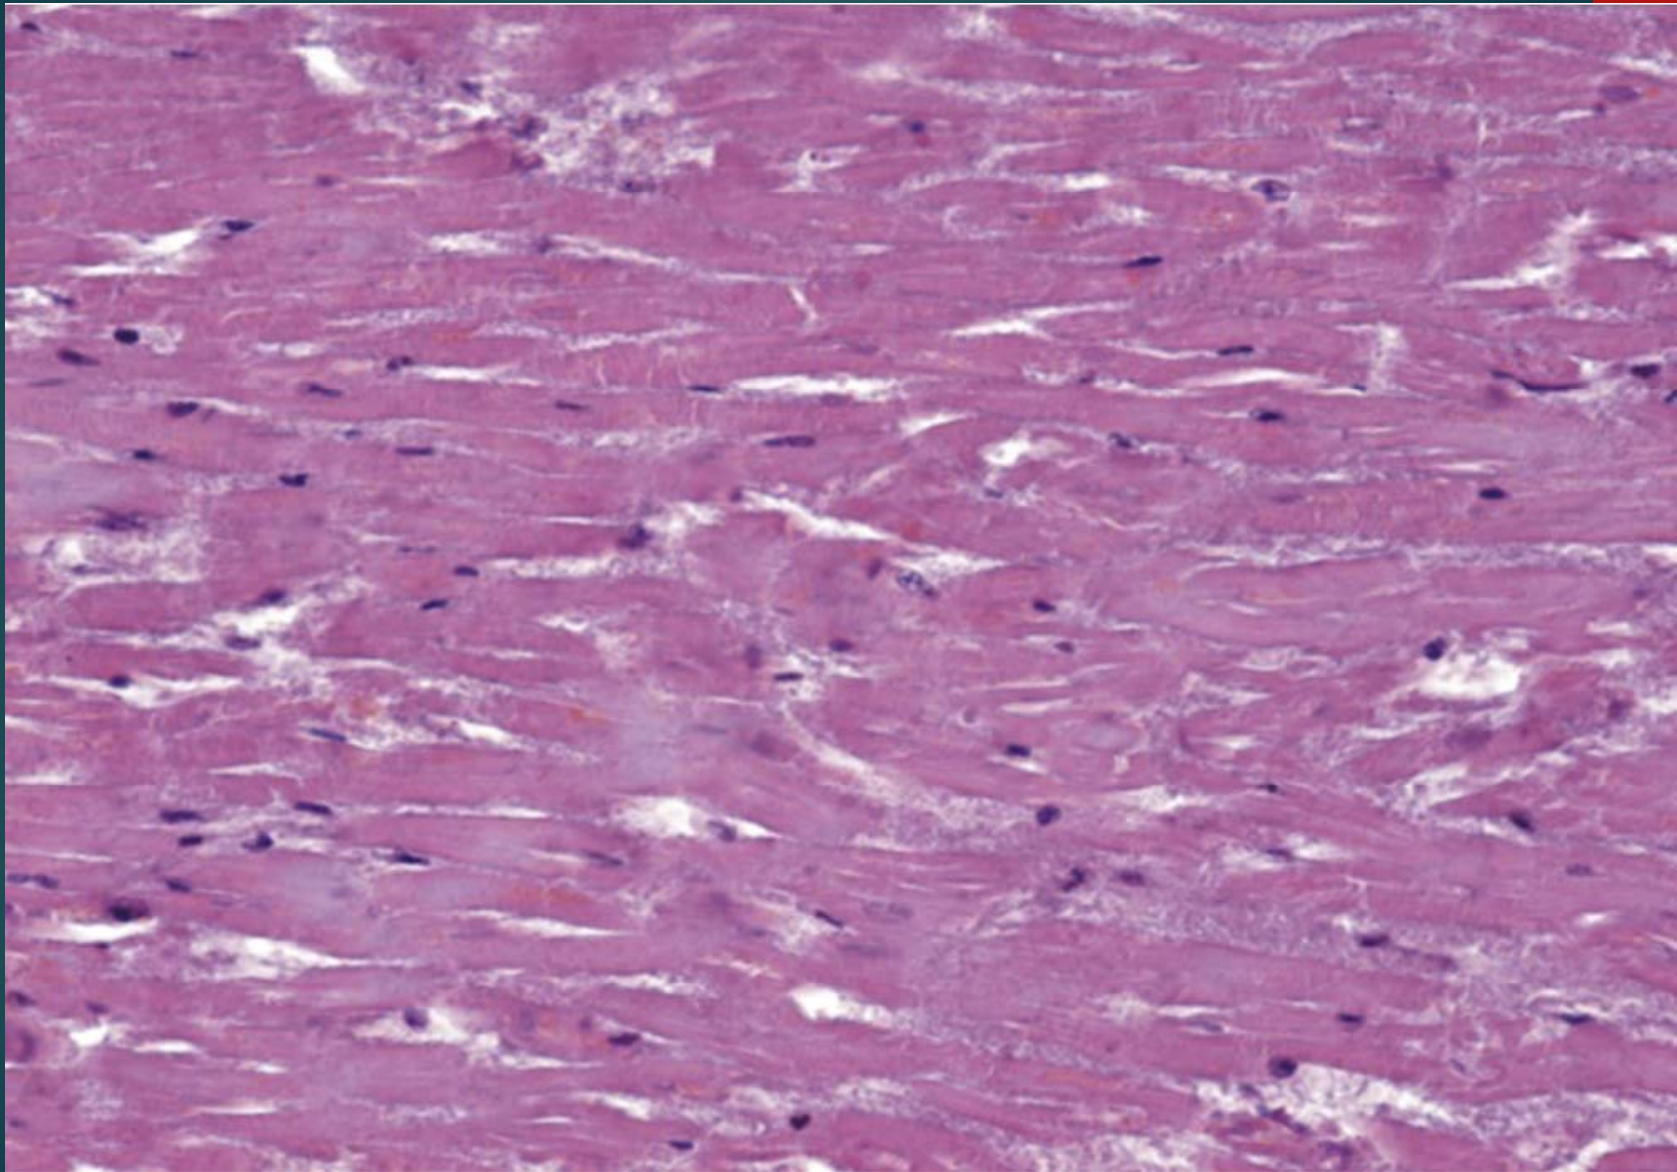

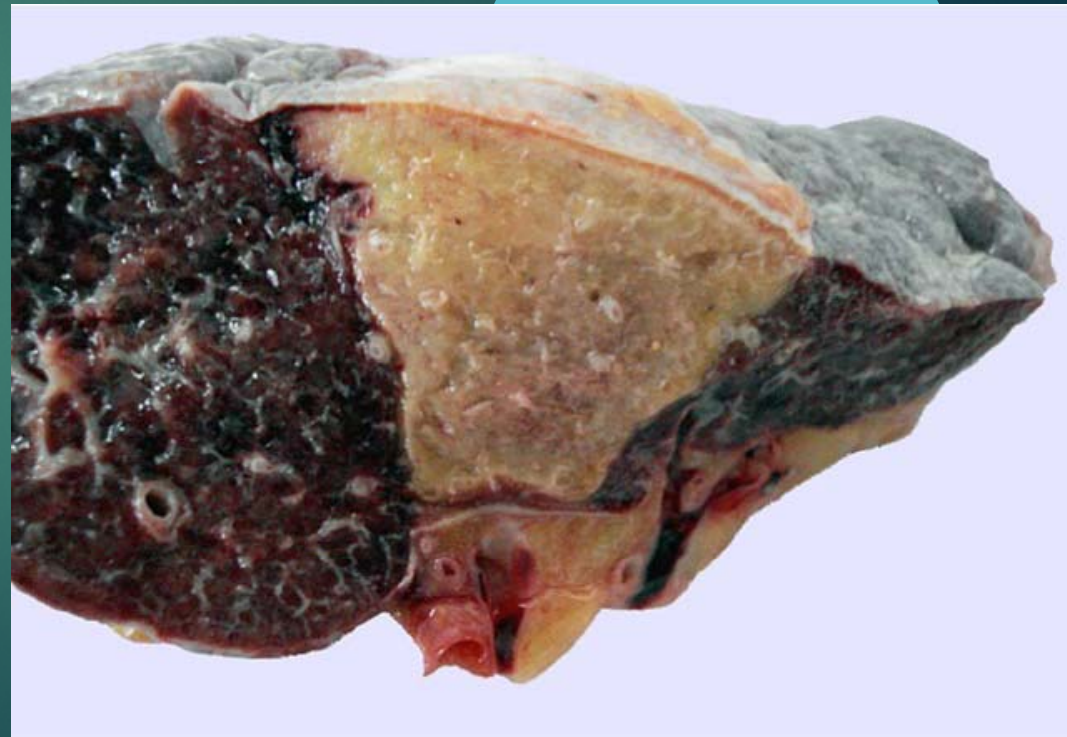

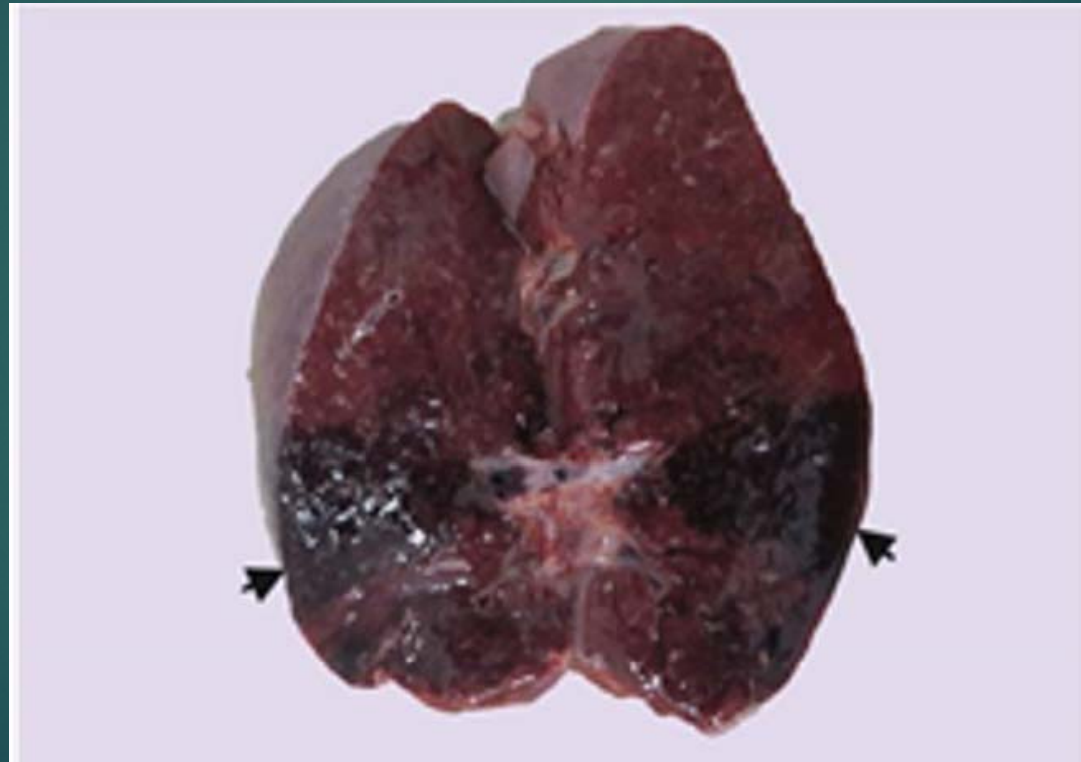

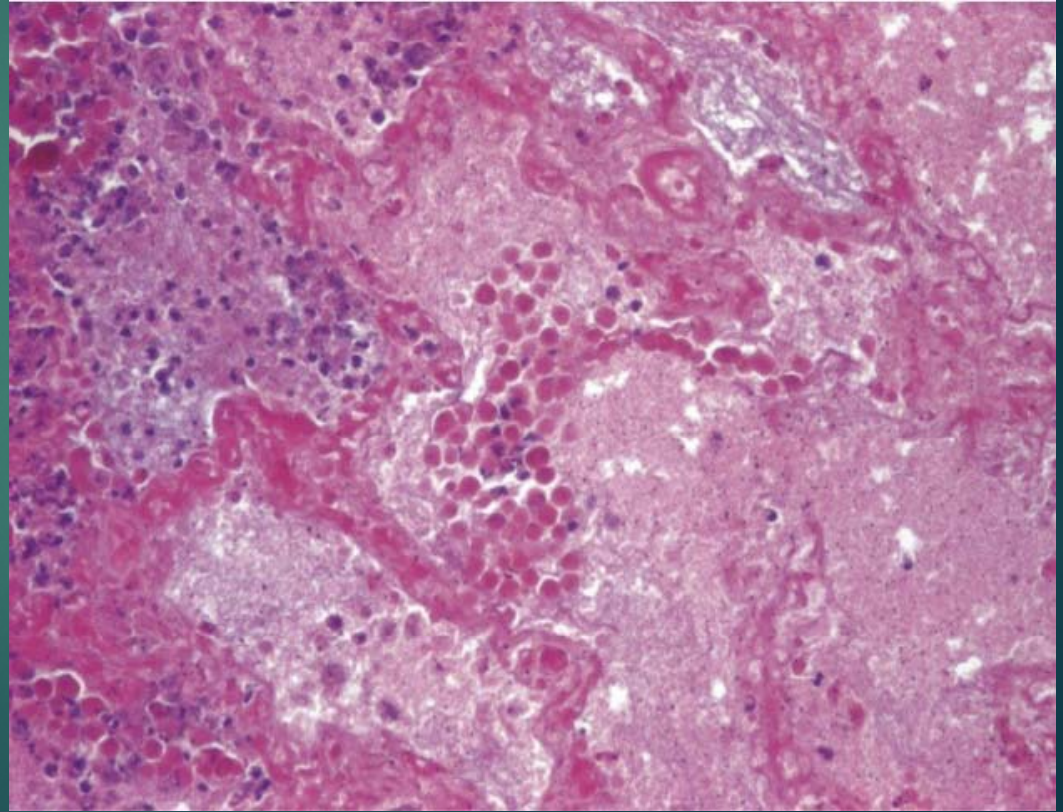

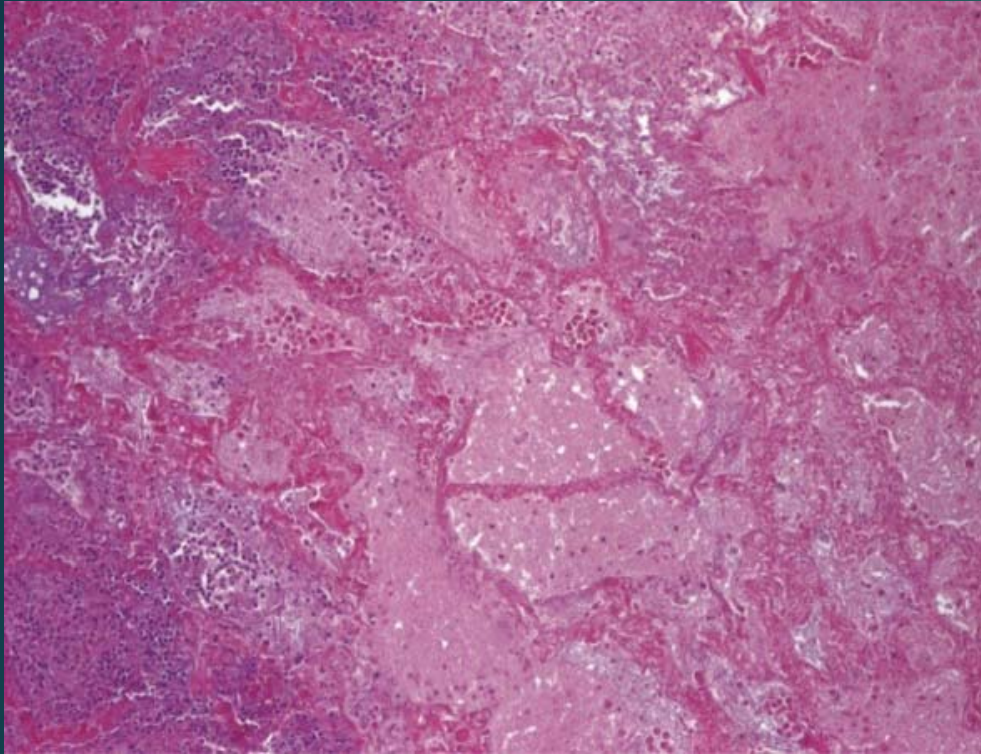

INFARCT SPLENIC

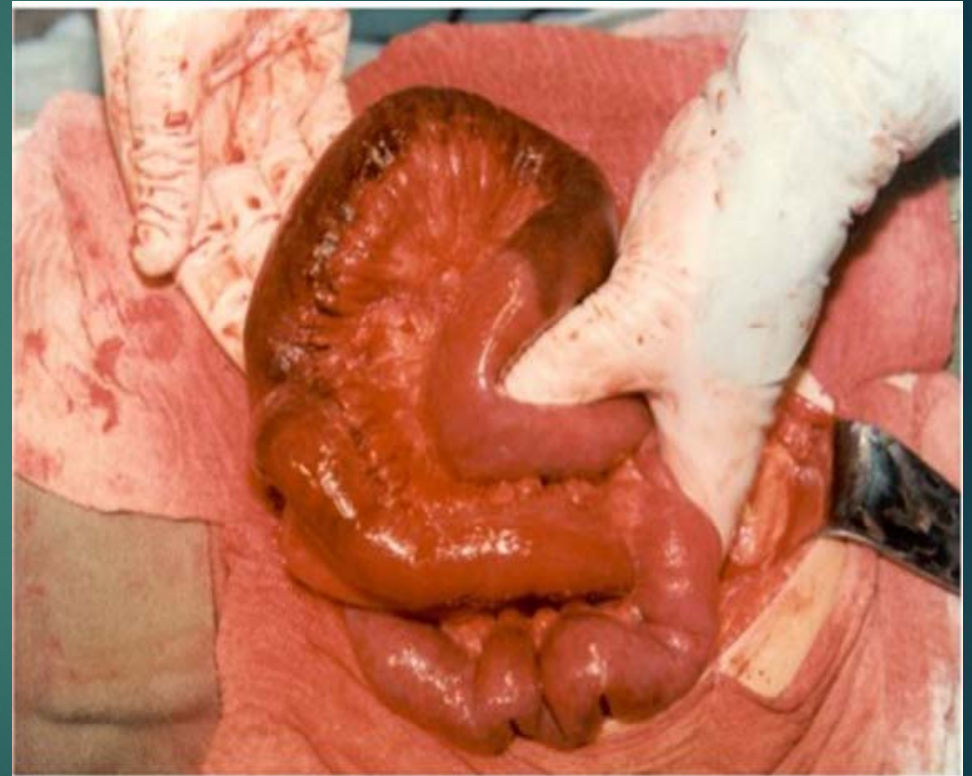

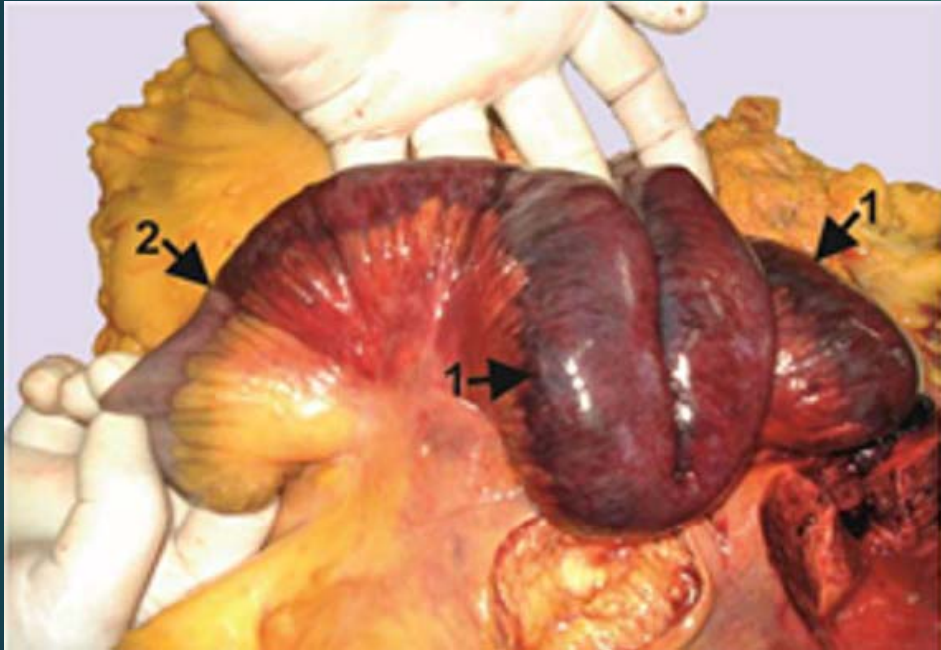

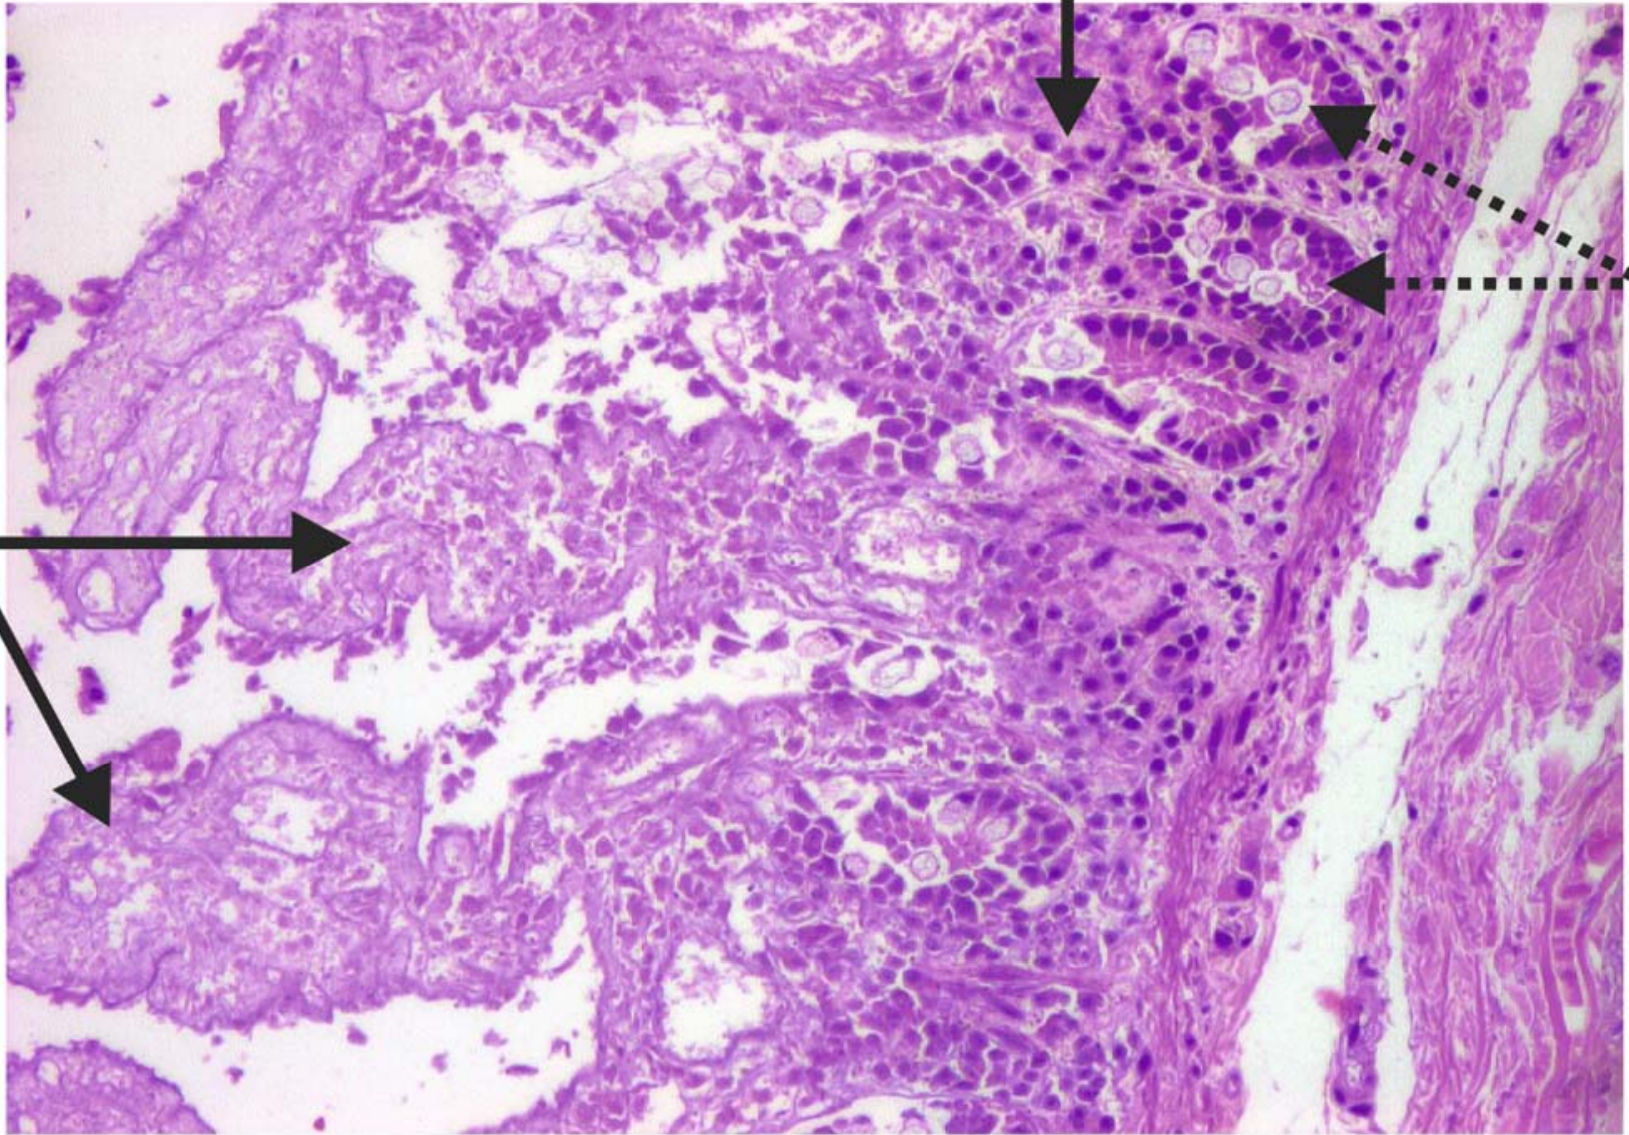

INFARCT PULMONAR

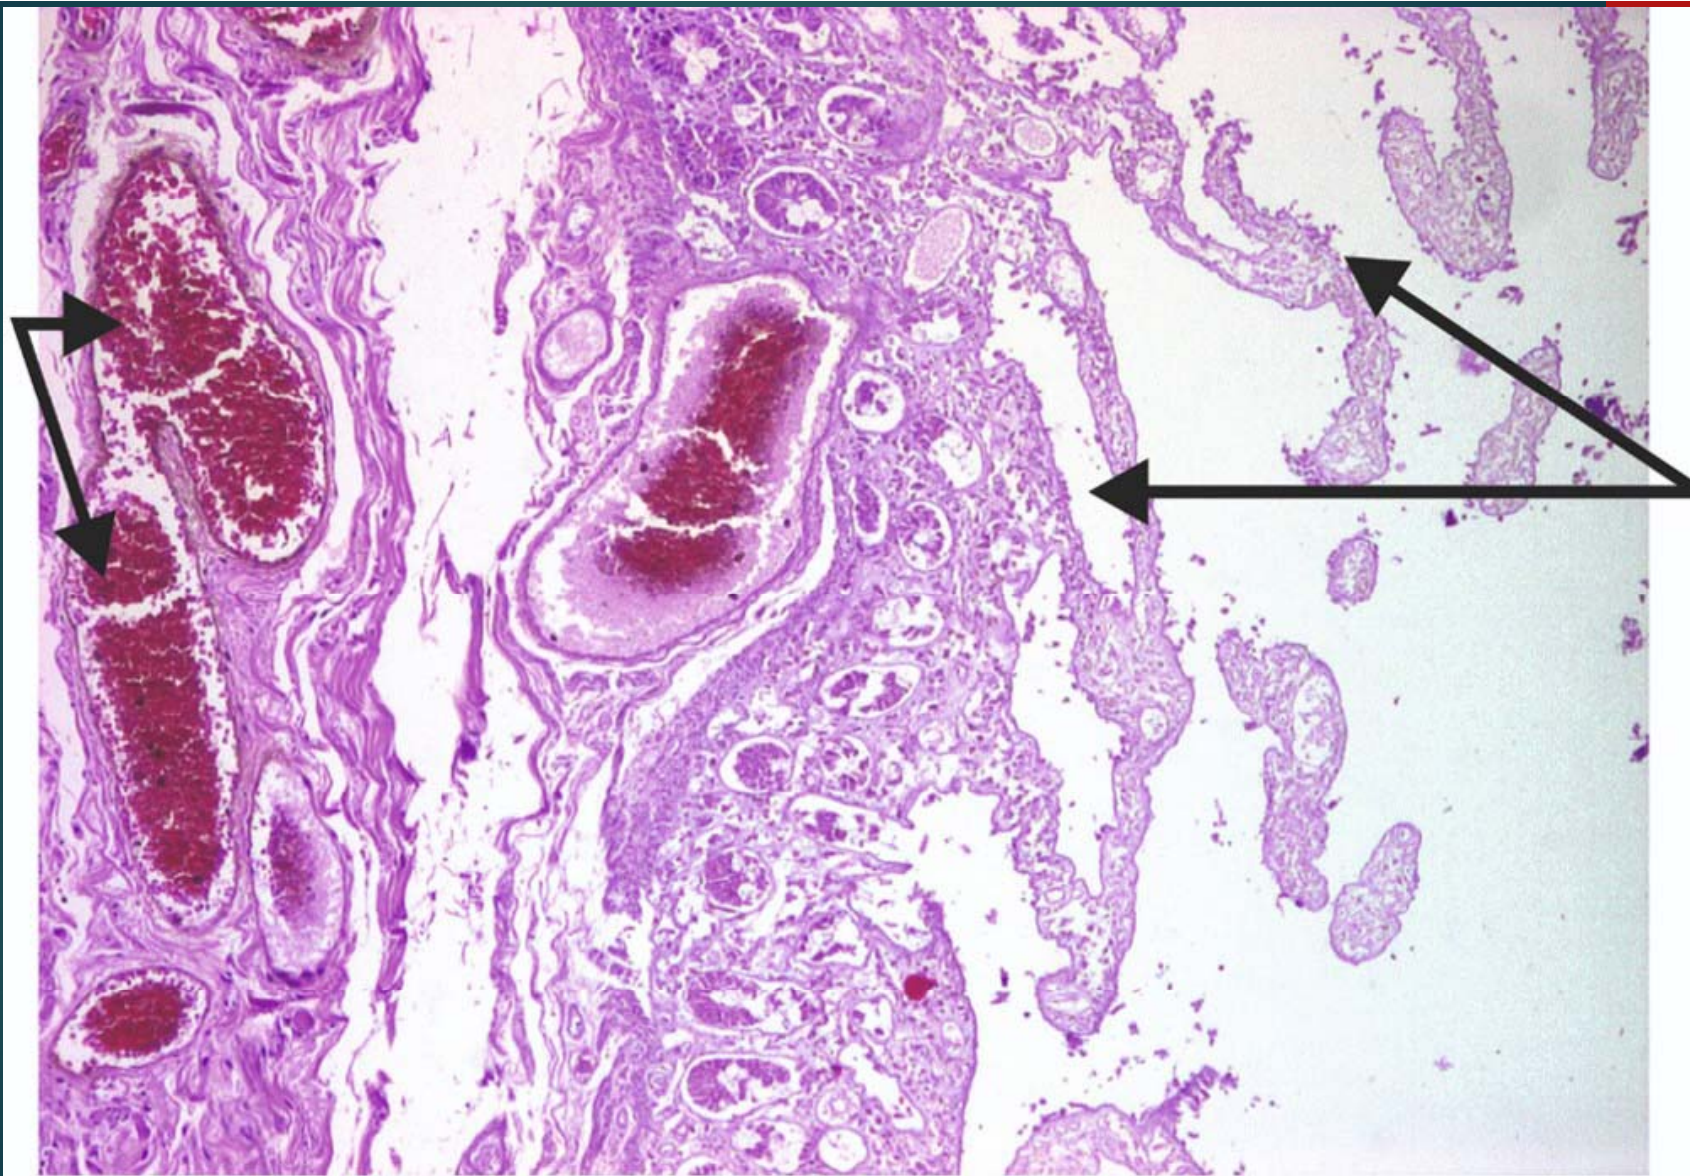

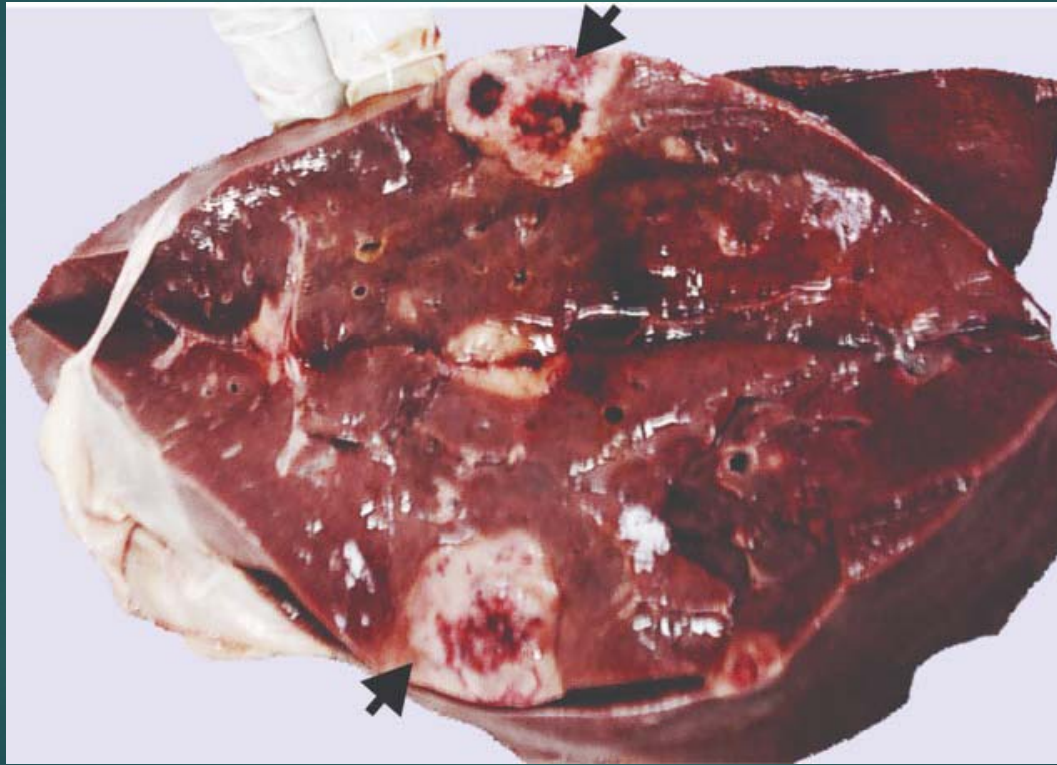

INFARCT INTESTINAL

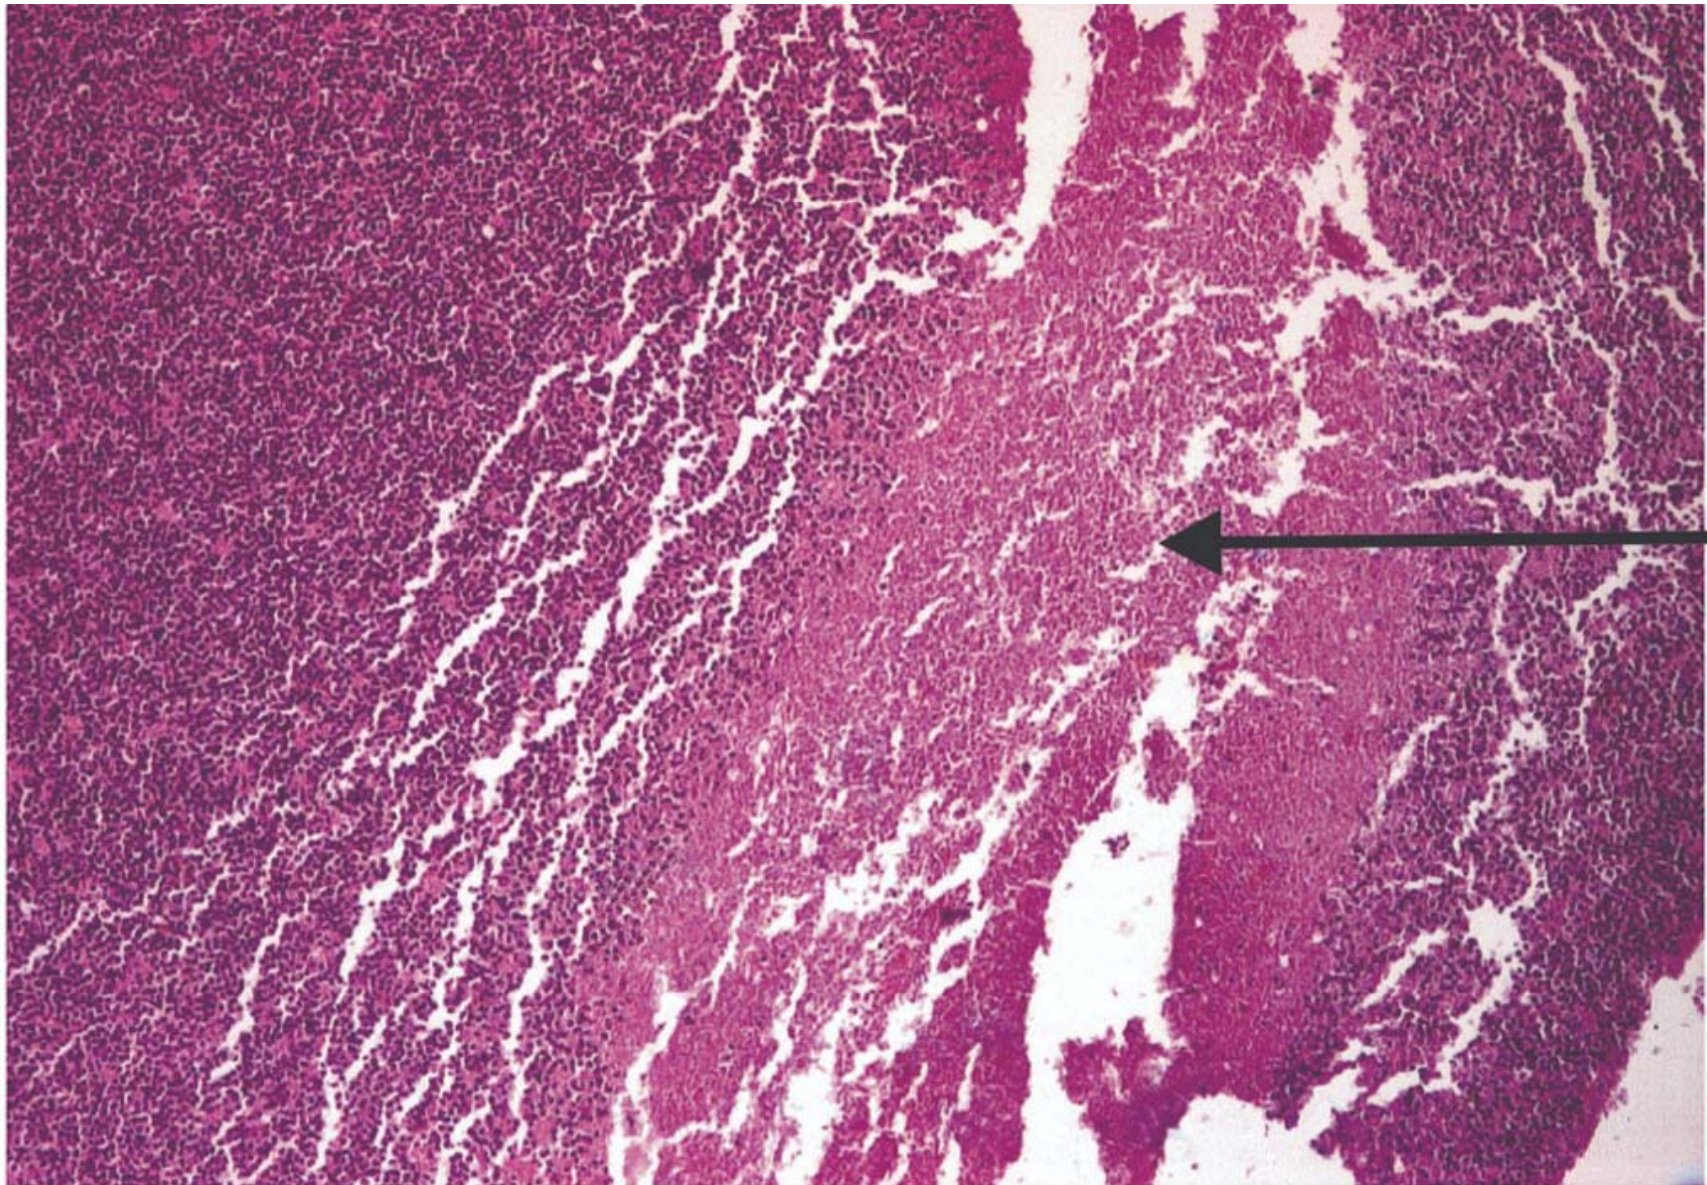

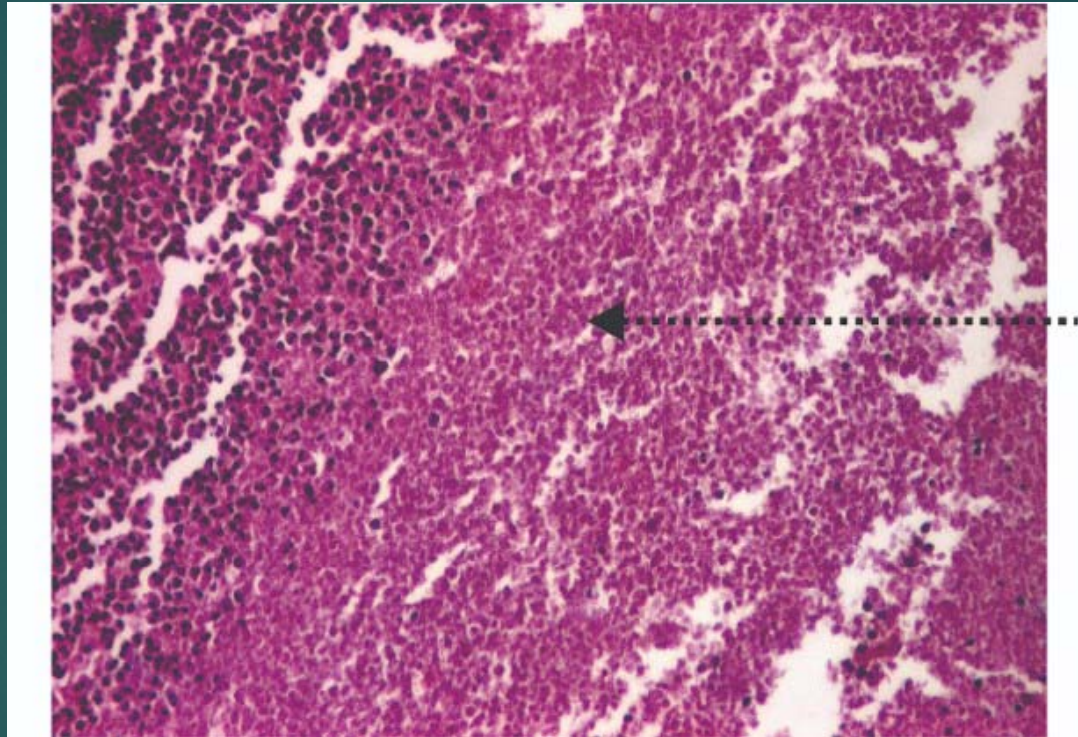

NECROZA DE LICHEFACTIE, FICAT

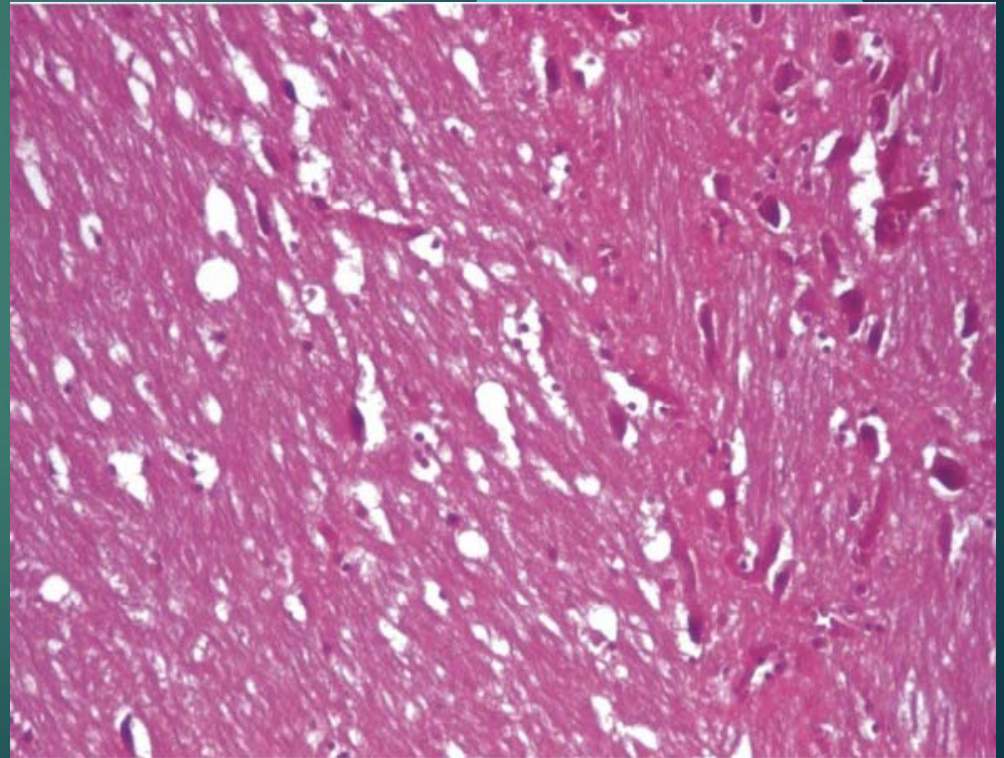

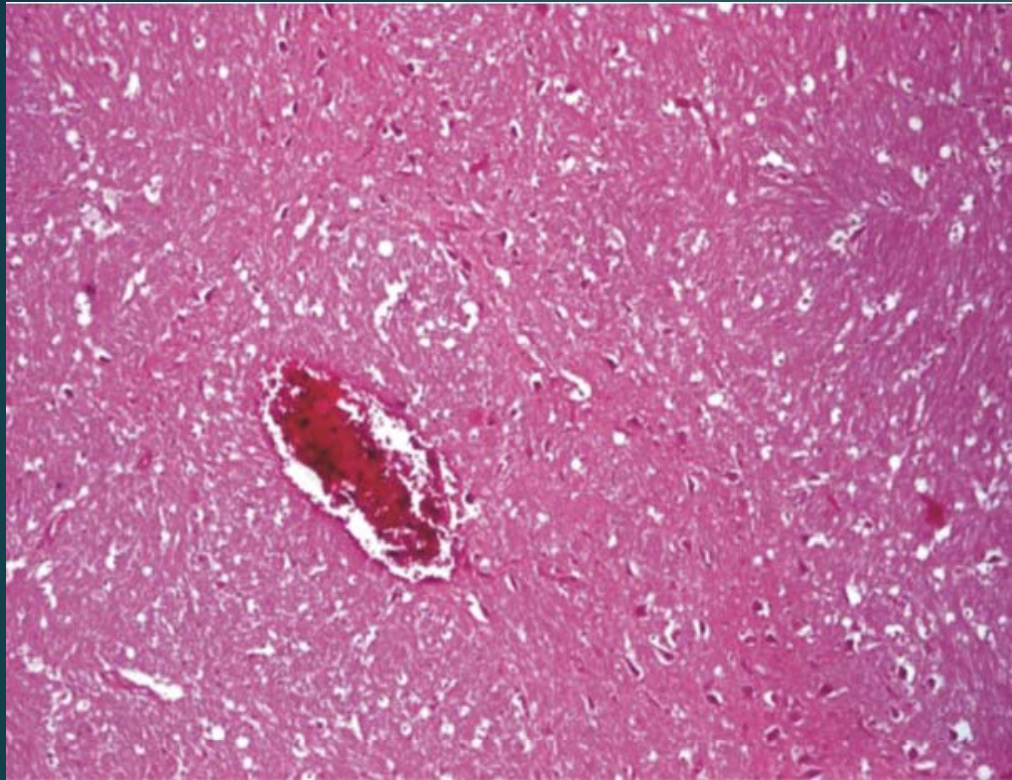

NECROZA DE LICHEFACTIE, CREIER

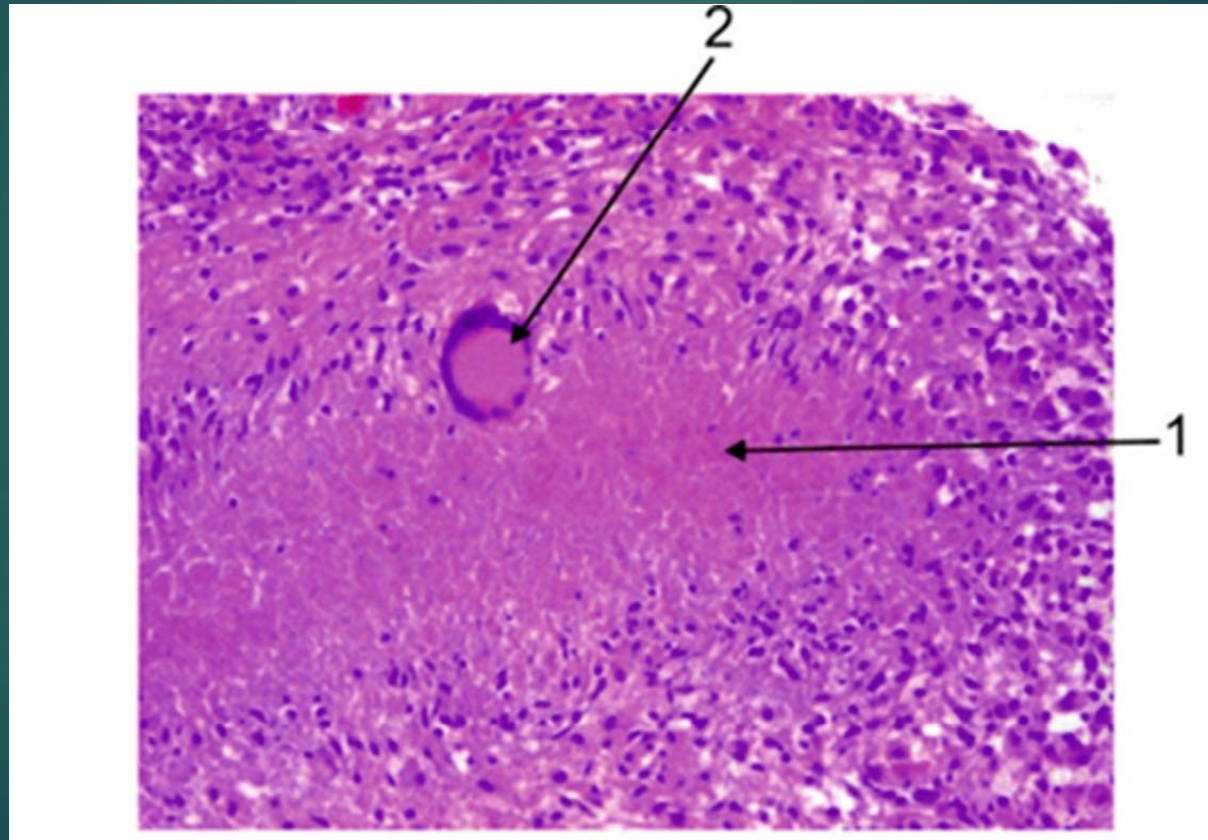

NECROZA DE CAZEIFICARE
