

# INFLAMAȚIA CRONICĂ

# ȚESUT DE GRANULAȚIE

# CLASIFICAREA INFLAMAȚIEI CRONICE

## ▶ DIFUZE

## ▶ GRANULOMATOASE

### ▶ Infecții

- ▶ Tuberculoză

- ▶ Lepră

- ▶ Sifilis

- ▶ Săruri minerale

- ▶ Medicamente

- ▶ Corpi străini

- ▶ endogeni- cheratină, colesterol, cristale de urat de sodiu;

- ▶ exogeni-talc, siliciu, silicon;

- ▶ Cauză necunoașcută

# CLASIFICAREA GRANULOAMELOR

## ▶ **GRANULOAME EPITELIOIDE**

- ▶ Granulomul sarcoidozic
- ▶ Granulomul tuberculos
- ▶ Granulom infecțios
- ▶ Granulom asociat tumorilor
- ▶ Granulomul din reacția de hipersensibilitate

## ▶ **GRANULOAME HISTIOCITARE**

- ▶ Granulomul reumatismal
- ▶ Granulomul reumatoid
- ▶ Granulomul de corp străin

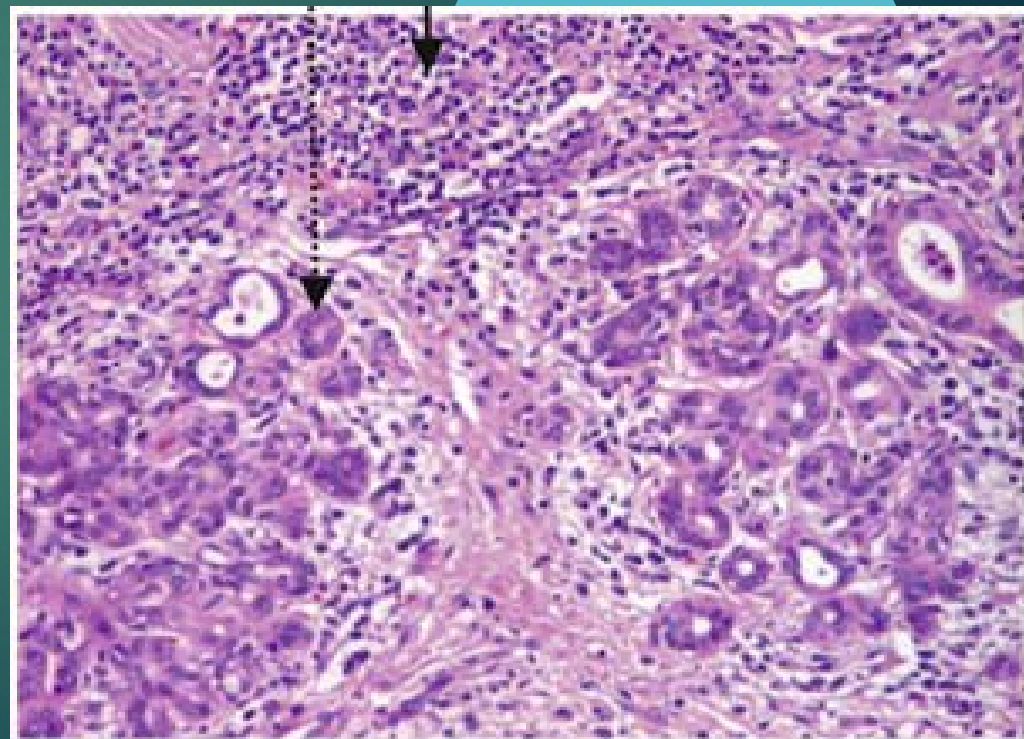

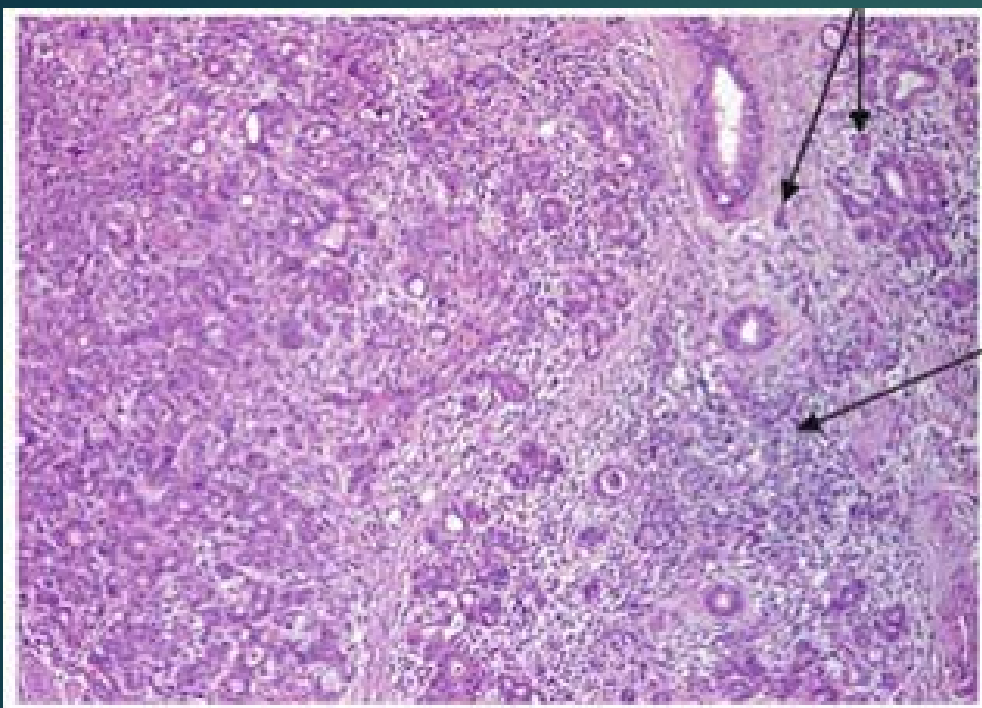

# INFLAMAȚIA CRONICĂ DIFUZĂ

# INFLAMAȚIA CRONICĂ GRANULOMATOASĂ

# GRANULOM EPITELIOD

TUBERCULOZĂ

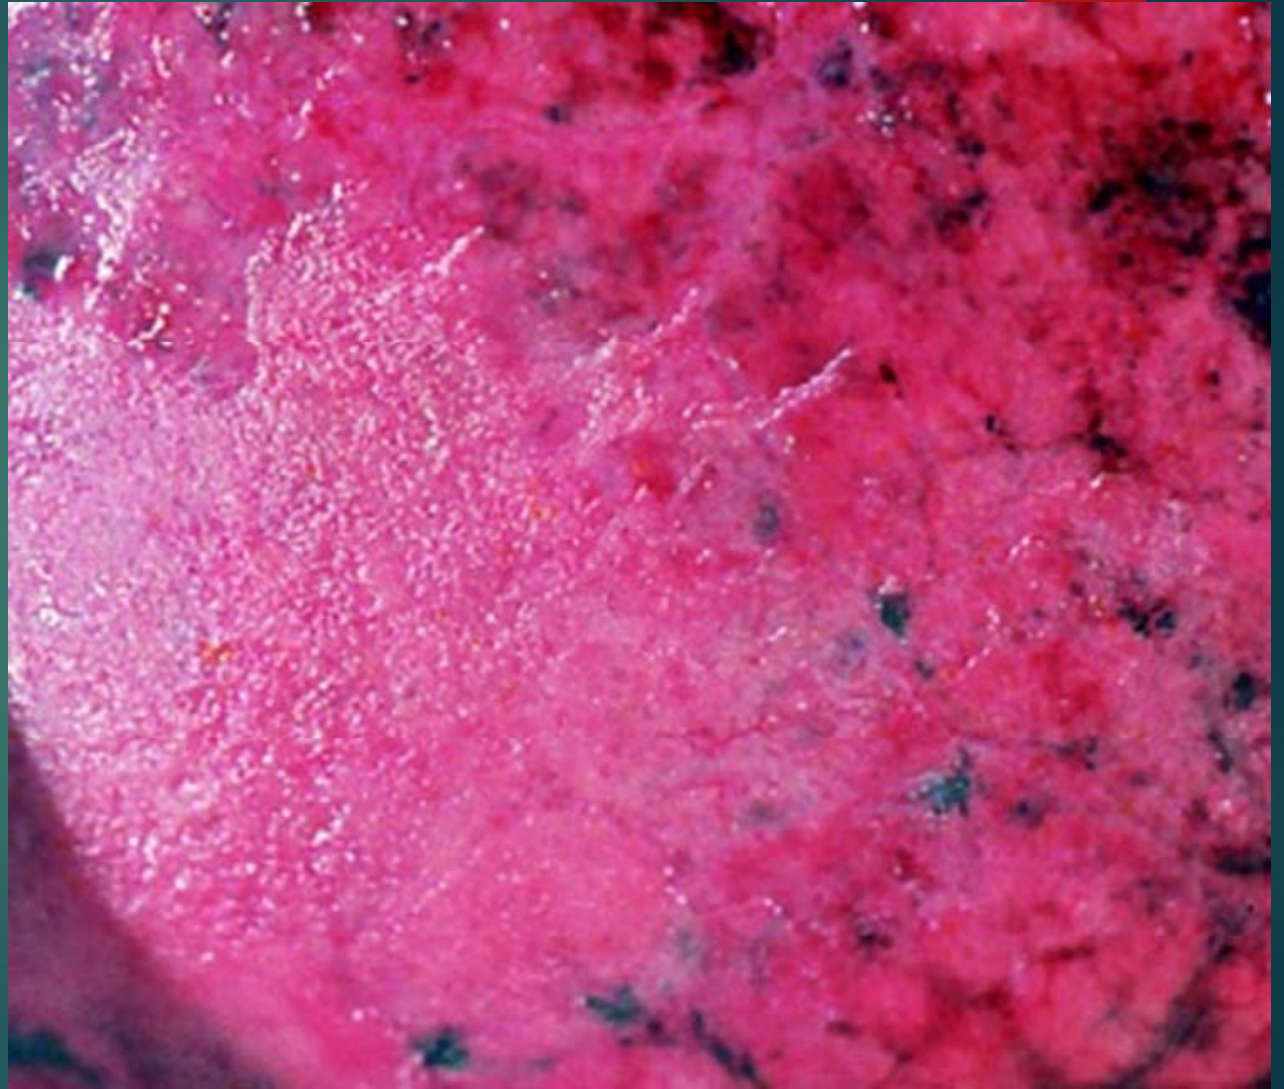

# Complexul primar tuberculos

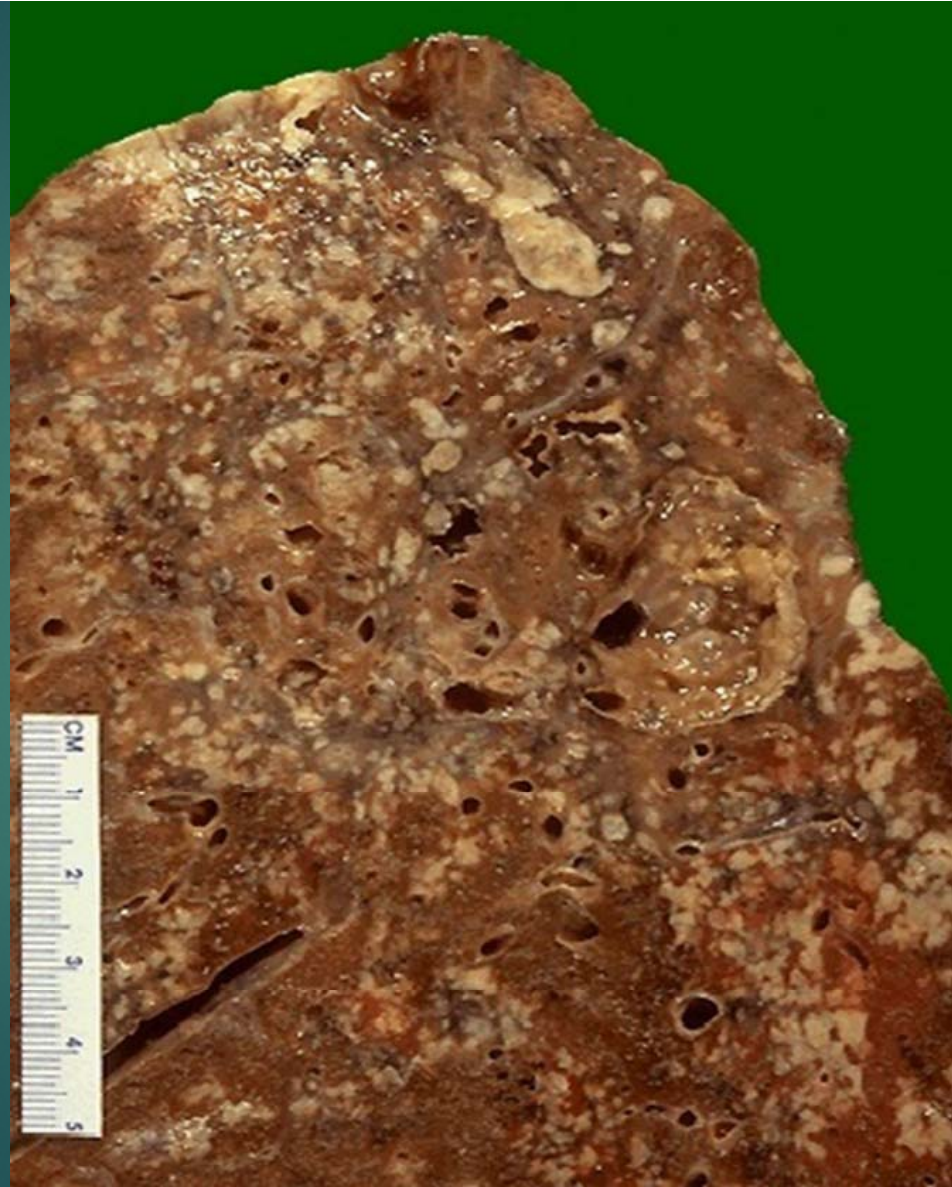

Leziuni exudative

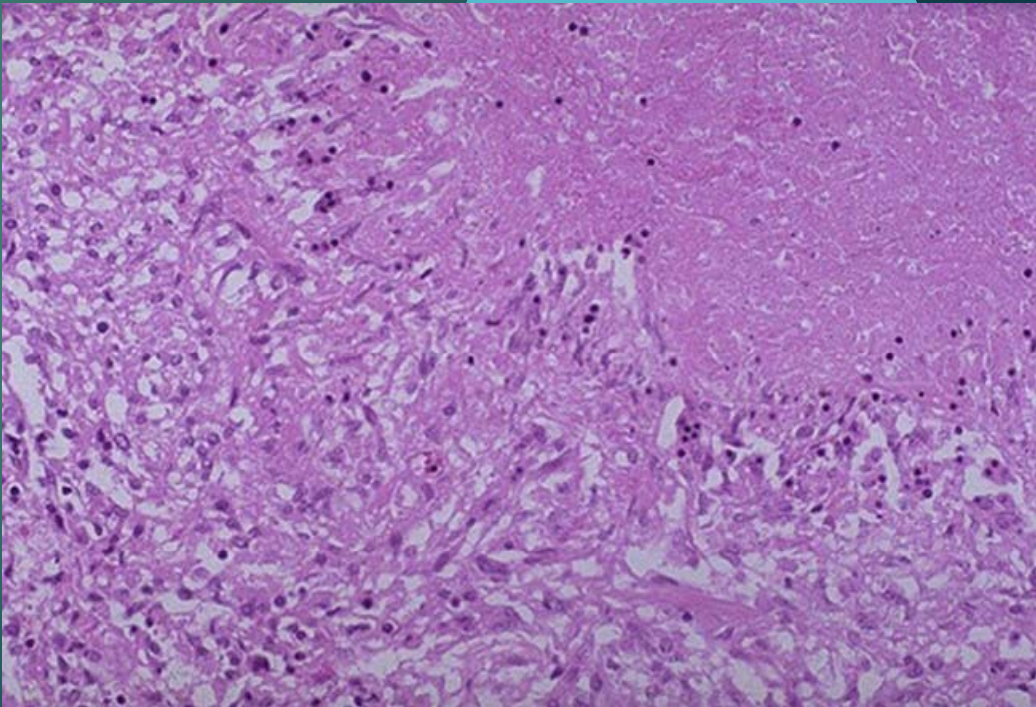

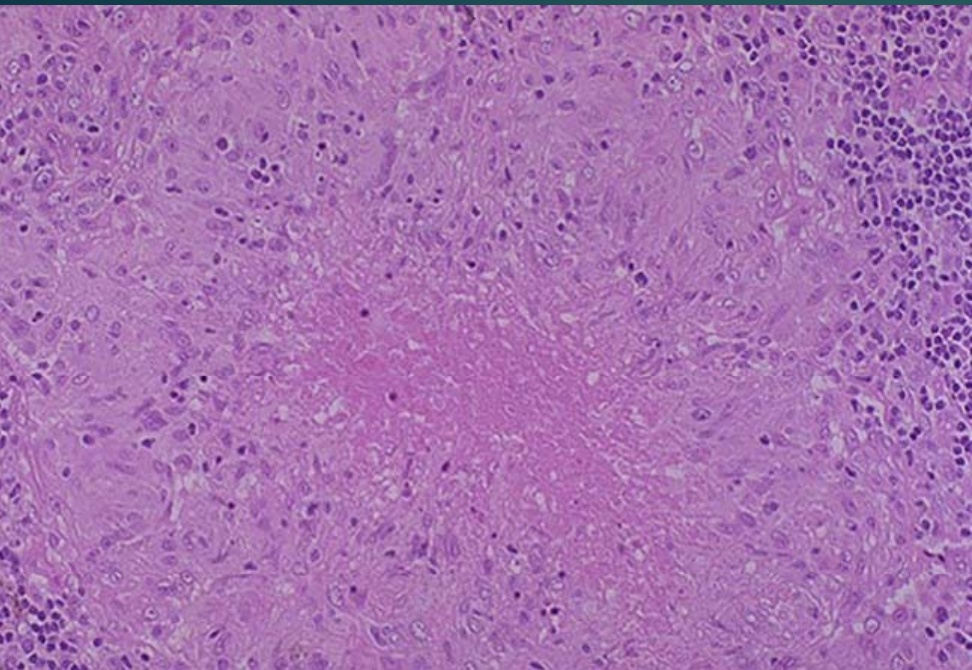

Leziuni alterative

# Leziuni proliferative (Granulomul tuberculos-Foliculul Koster)
