

LP UROGENITAL

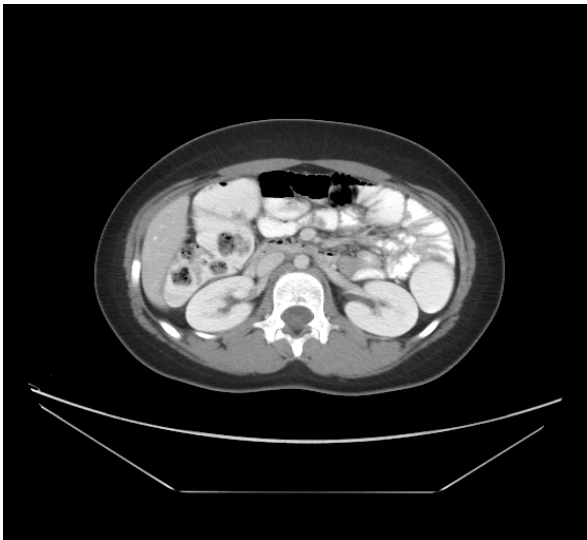

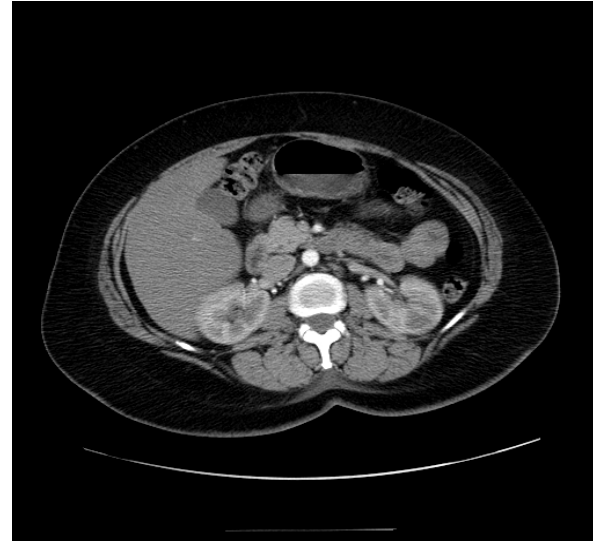

## Segmentele ureterului

## Aspect normal urografie intravenoasa

**Aspect CT normal (nativ, arterial, venos si tardiv)**

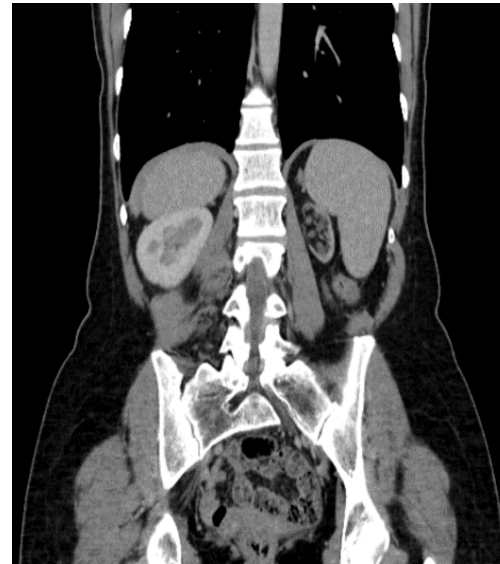

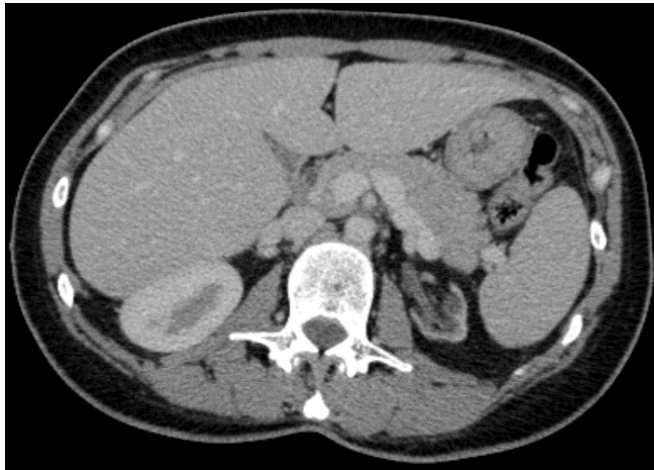

**RX simpla, aspect de calculi coraliformi renal bilateral**

**Urografie intravenoasa, calcul ureteral stang + UHN supraiacentă**

**Aspect CT, rinichi stang hipoplazic, rinichi drept marit compensator**

## Aspect RX si CT de rinichi in potcoava

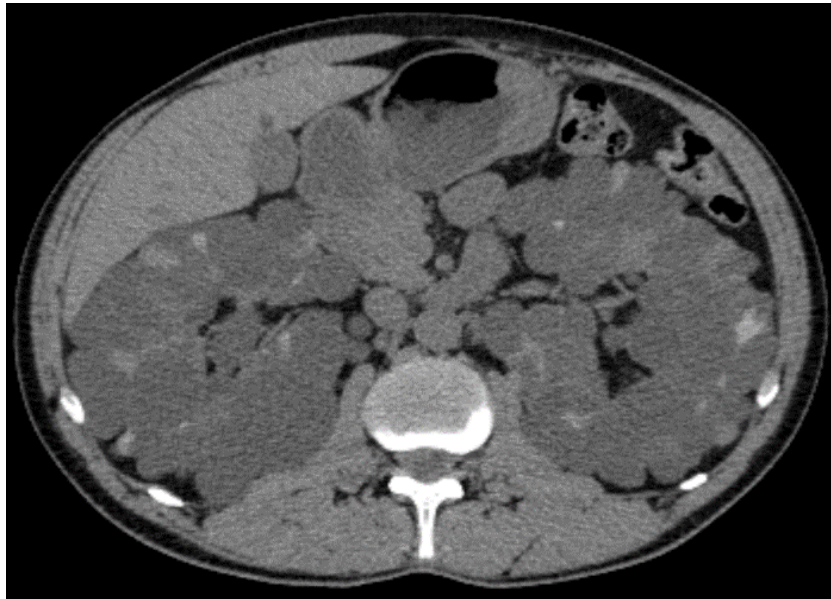

**Ectopie renala incrucisata, aspect la urografia intravenoasa, ambii rinichi sunt de partea stanga**

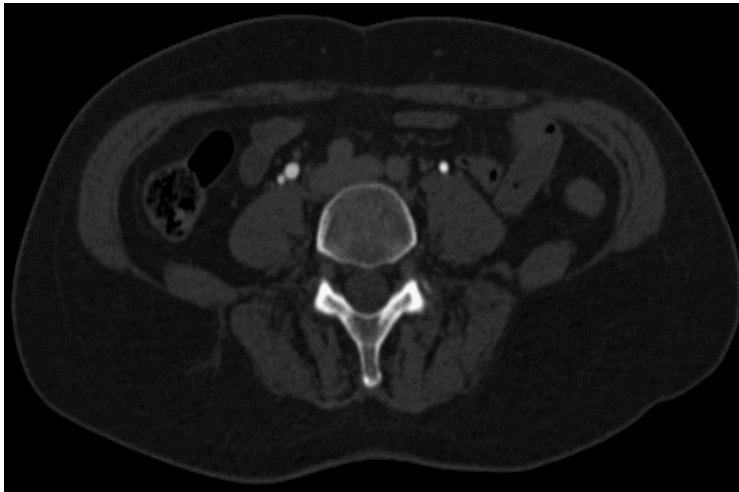

**Aspect CT, faza tardiva, RS normal pozitionat, RD ptozat, ureter sinuos**

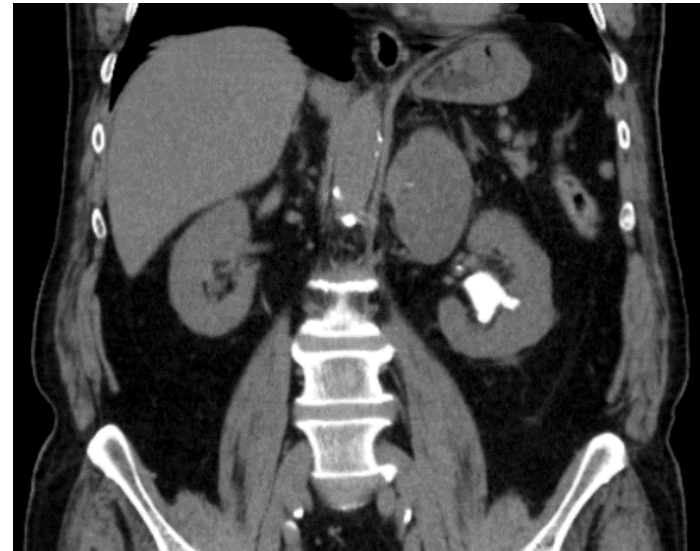

## Aspect CT de rinichi polichistici

## Duplicitate ureterala dreapta, aspect CT, faza tardiva

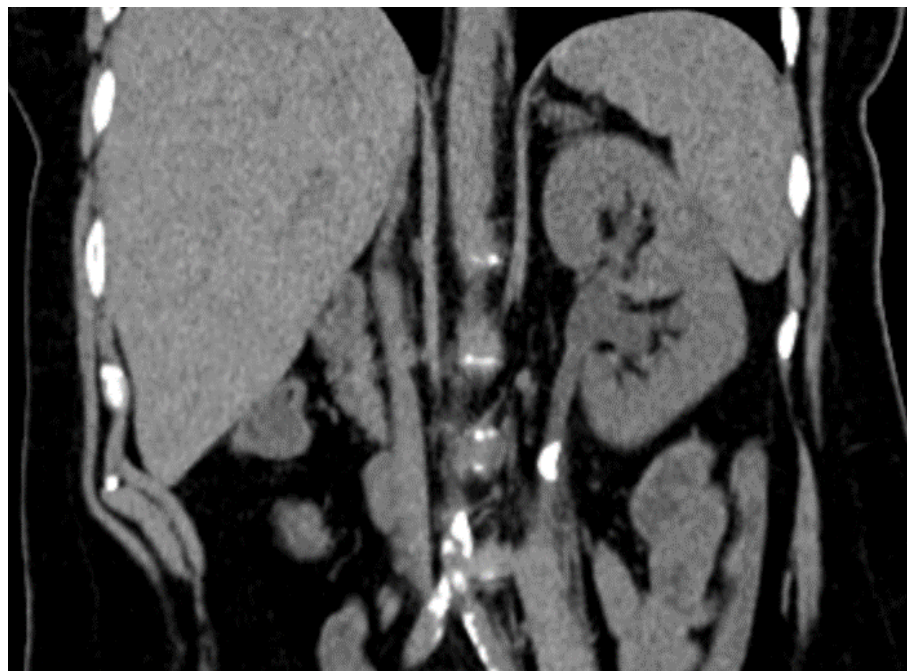

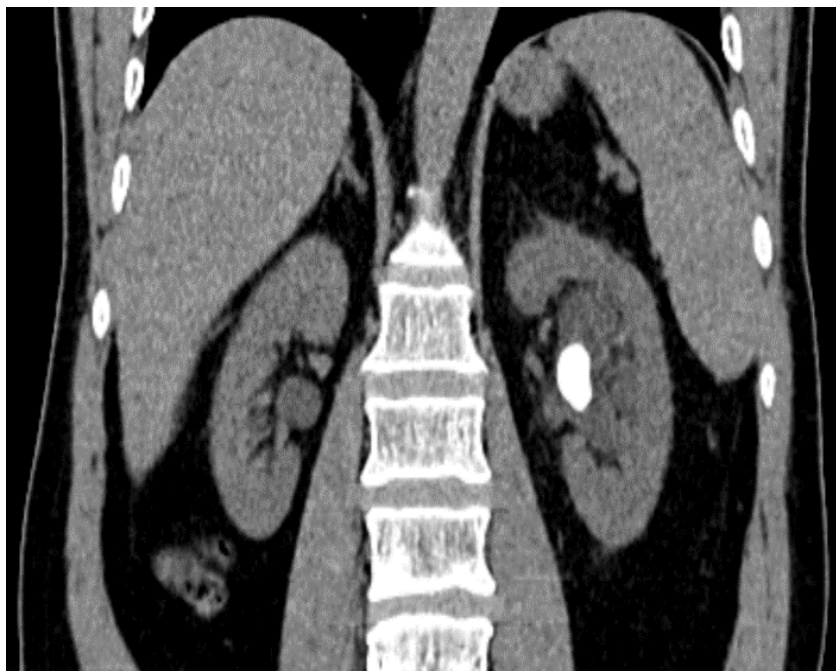

## Calcul coraliform renal stang, aspect CT nativ

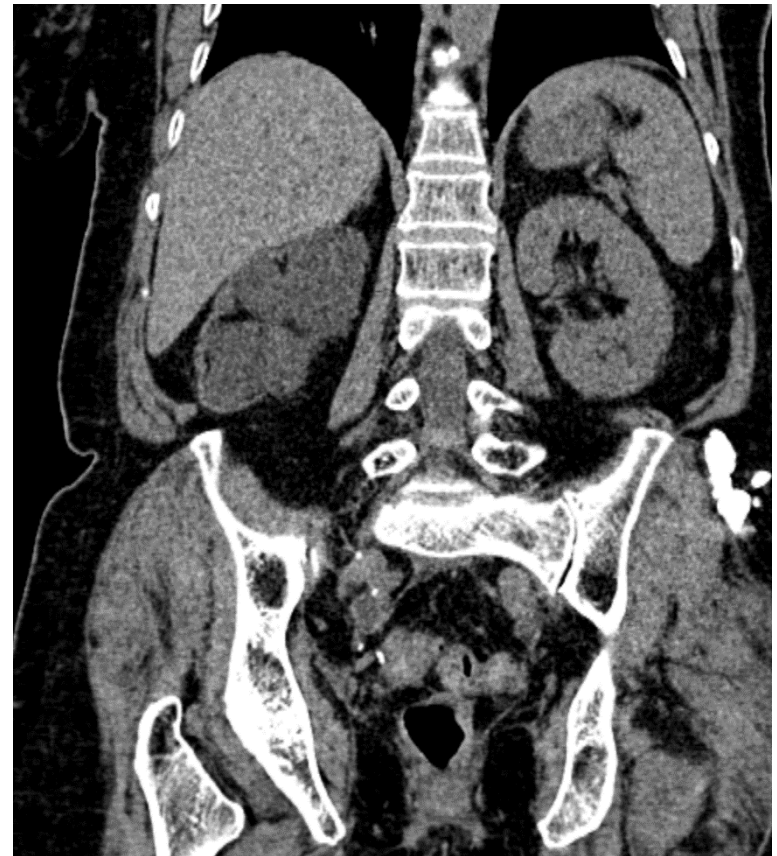

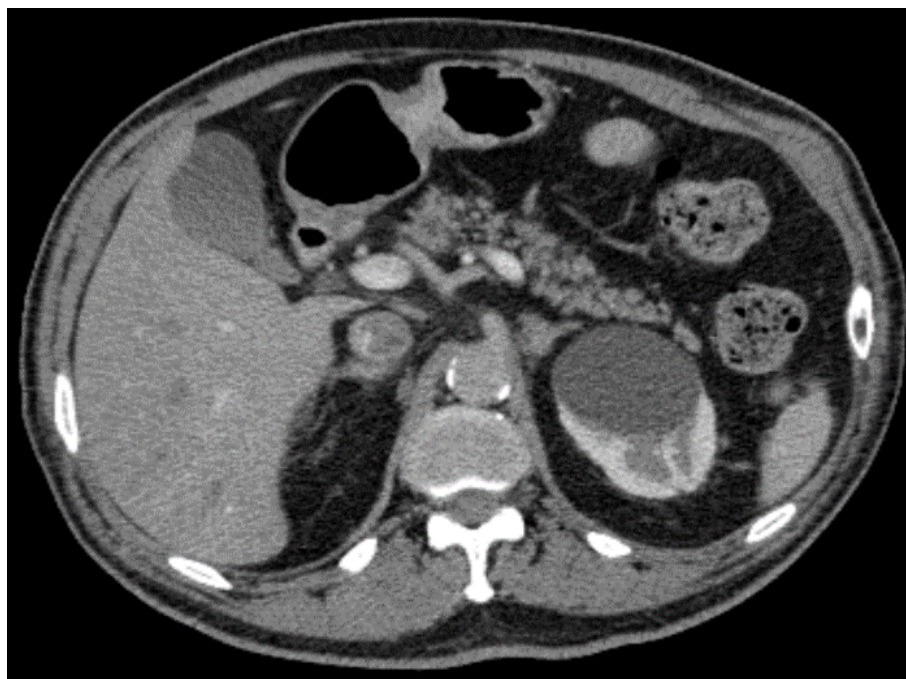

**Litiiza renala stanga (1) si ureterala stanga (2), aspect CT nativ**

**Aspect RM si CT de ureterohidronefroza dreapta gradul IV, indice parenchimatous foarte mult redus in dimensiuni**

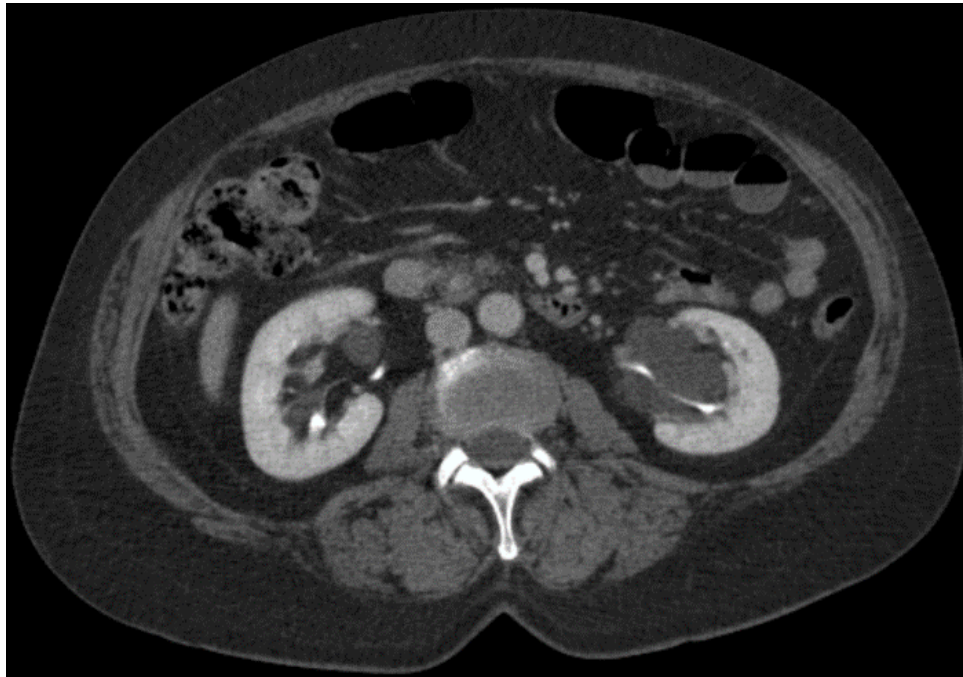

**Aspect CT postcontrast intravenos de chist renal simplu de partea stanga**

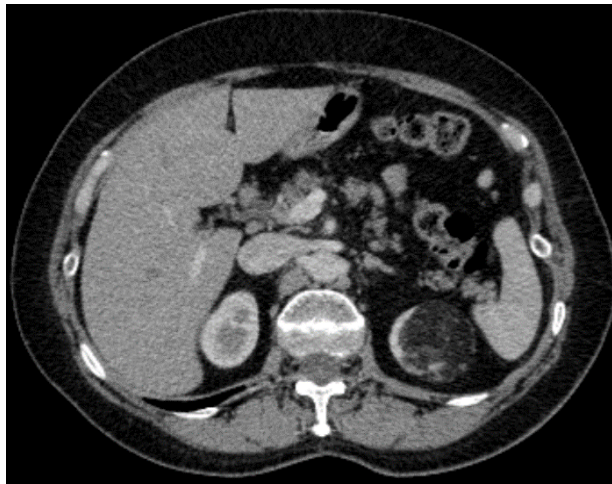

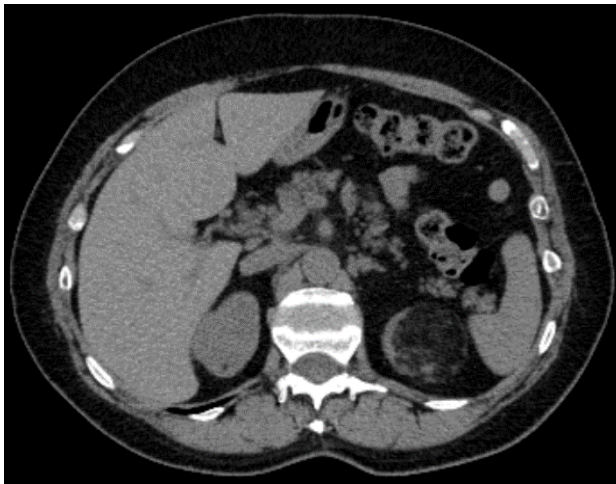

**Aspect CT, faza tardiva, chisturi parapielice renal stanga (de stiut diagnosticul diferential cu UHN)**

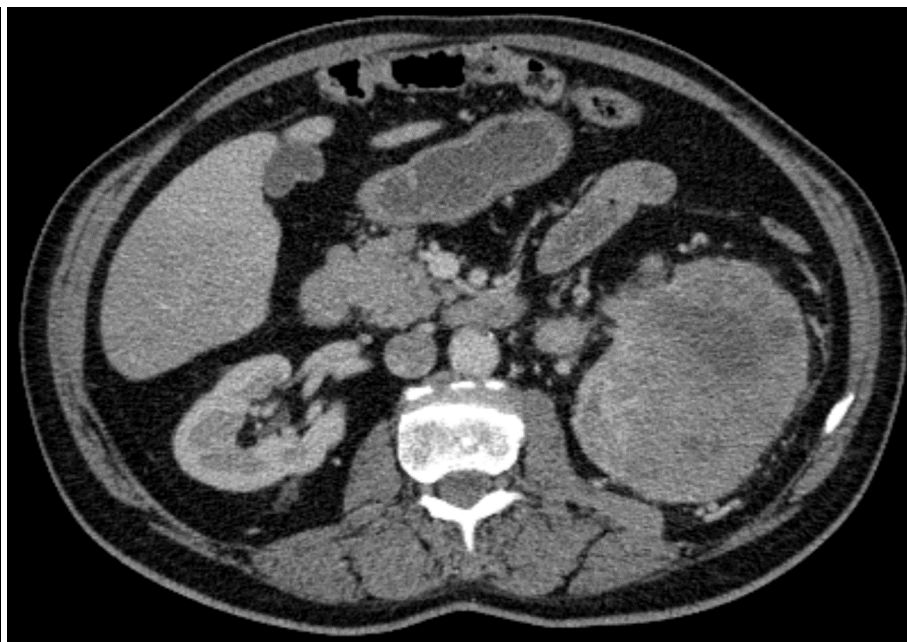

## Dilacerare renala dreapta, aspect CT

## Tumora renala benigna, angiomiolipom renal stang, aspect CT

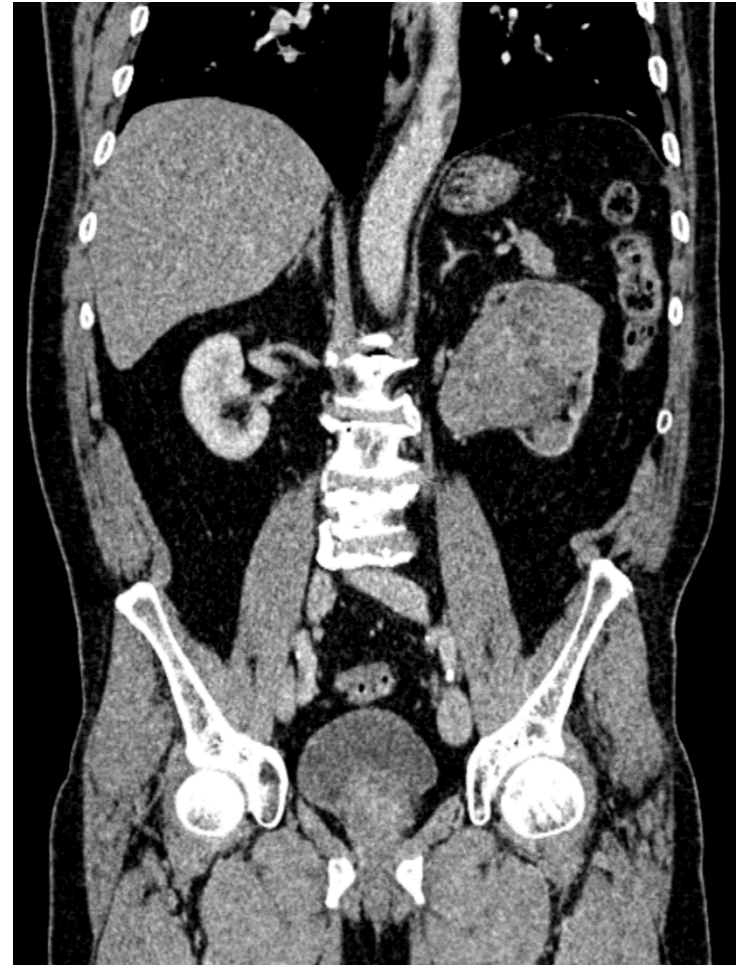

**Tumora maligna renala dreapta (1) si stanga (2), aspect CT postcontrast intravenos**

**Carcinom urotelial cu UHN supraiacentă de partea stângă, aspect CT**

**Infarct renal, aspect CT postcontrast intravenos**

## Aspect CT de calcul la nivelul vezicii urinare

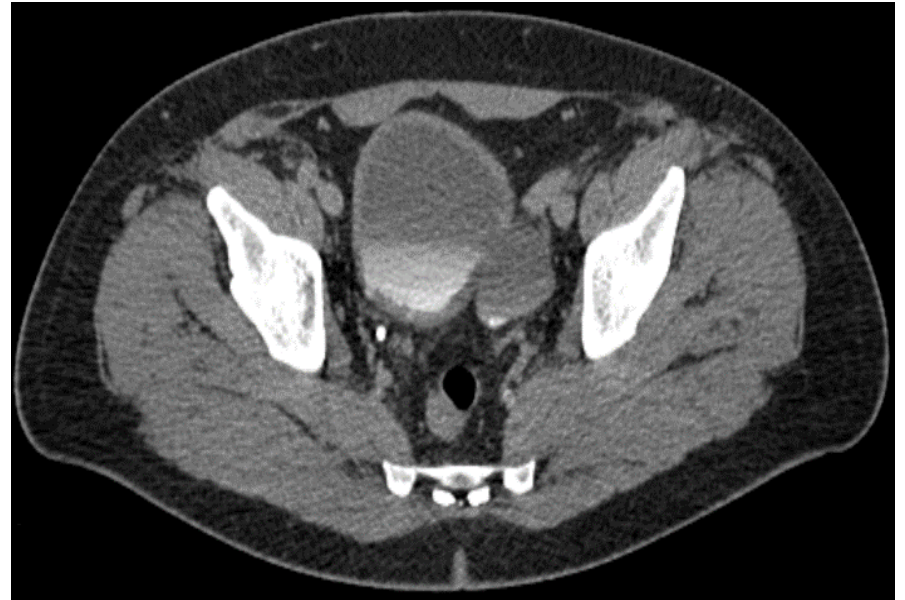

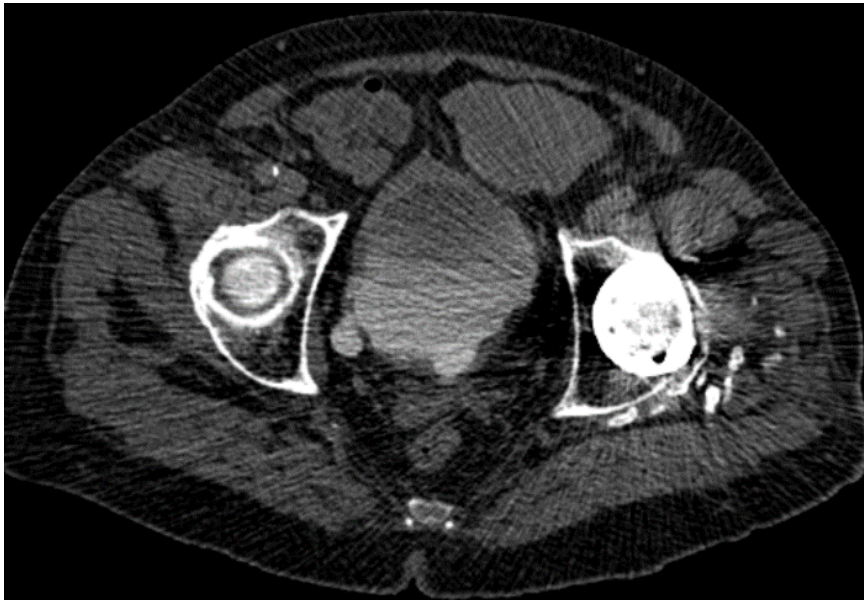

**Calculi intravezicali, aspect IRM, secventa T2**

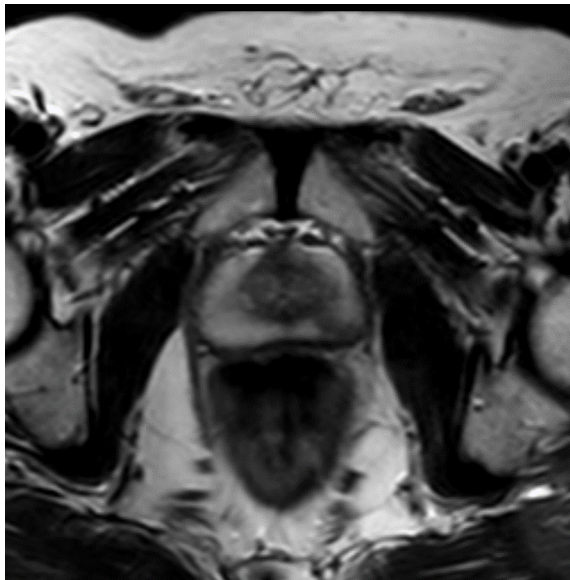

**Diverticuli vezicali, aspect CT, faza tardiva postcontrast intravenos**

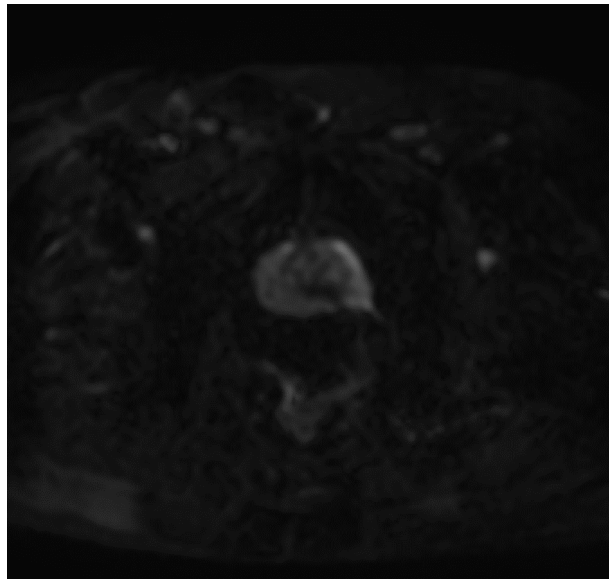

**Carcinom al vezicii urinare, aspect CT postcontrast intravenos (faza arteriala – tumora capteaza + faza tardiva – contrastul ajunge la nivelul vezicii urinare, iar tumora apare ca un defect de umplere), invazia ureterului stang**

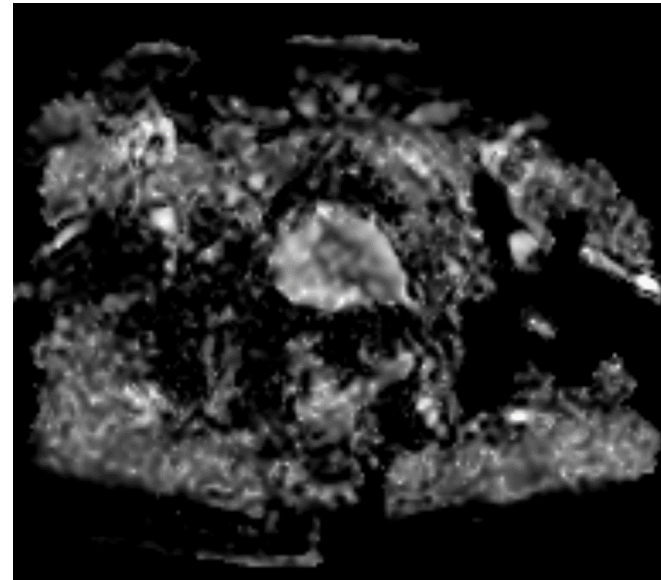

## RM prostata exemplu

T2

DWI

ADC

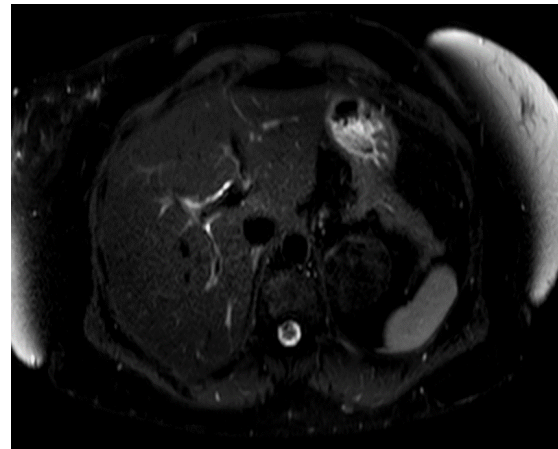

## Chist de glanda suprarenala dreapta

## Mielolipom suprarenalian (aspect RM)

**T2**

**T2 SPAIR  
(fat suppression)**

## Adenom suprarénalien stang, aspect CT
